Don't Give Up.
Plan Your Future With VIRACEPT®.
Because it's strong and effective. Keep your viral load down with the #1 prescribed HIV medication of its kind.* VIRACEPT works with you to keep your life on track.
Because it's easy to live with. VIRACEPT's easy dosing schedule and manageable side effects have been helping all kinds of people continue to lead their lives on their own terms.
Because it saves future options. When choosing a treatment plan, it's important to consider what options you will have in the future. Studies show taking VIRACEPT early on leaves you with choices in treatment for later. Ask your doctor about your future with VIRACEPT.
VIRACEPT®
nelfinavir mesylate
tablets and oral powder
VIRACEPT is indicated in combination with other antiretroviral agents for the treatment of HIV infection. The most common side effect of VIRACEPT is diarrhea, which can usually be controlled with over-the-counter treatments. Some prescription and non-prescription drugs and supplements should not be taken with VIRACEPT, so talk to your doctor first. For some people, protease inhibitors have been associated with the onset or worsening of diabetes mellitus and hyperglycemia, changes in body fat, and increased bleeding in hemophiliacs. HIV drugs do not cure HIV infection or prevent you from spreading the virus.
Refer to the important information on the next page. For more information, call toll free 1-888-VIRACEPT or visit www.viracept.com.
