

HEPATITIS A&B...no big deal, right?

Nausea so bad you want to die
A month away from work.
No appetite for weeks.
No sex. No beer, no wine,
no vodka. No gym.
Stuck in the hospital.
Yellow skin. Yellow eyes.
Fever. Chills.
And years later...
some liver damage,
maybe even death.

You can prevent all this—so why don't you?

The fact is, hepatitis *is* a very big deal. And men who have sex with men are at greater risk for hepatitis A and B. That's why the Gay and Lesbian Medical Association (GLMA), as well as the Centers for Disease Control and Prevention (CDC), recommends you get vaccinated to prevent these 2 serious diseases.

PROTECT YOURSELF! See your doctor about vaccination today. For referral to a gay-friendly physician near you, call GLMA at 1-877-LGBTDOC or visit our Web site at www.glma.org/hepatitis

Free hepatitis A & hepatitis B Vaccination and HIV testing

The Multnomah County Health Department booth
at Portland Pride 2003

Saturday, June 14th, 2 pm to 6 pm

Sunday, June 15th, 1 pm to 5 pm
