DR. CUREIT, OF THE HEALTH DEPARTMENT, DEBATES PHIL THE SYPHILIS SORE.

A QUESTION FOR DR. CUREIT.

I'M HIV POSITIVE. SHOULD I BE CONCERNED ABOUT SYPHILIS?

HAVING SYPHILIS MAKES IT AT LEAST TWICE AS EASY TO GIVE HIV TO YOUR SEX PARTNERS.

ALSO, IF YOU DON'T GET TESTED REGULARLY, YOU COULD HAVE SYPHILIS AND NOT KNOW IT. AFTER A WHILE, IT CAN CAUSE PERMANENT DAMAGE TO YOUR HEART AND BRAIN.

PHIL, YOUR REBUTTAL?

WHAT'S THE BIG DEAL ABOUT A LITTLE BRAIN DAMAGE?

WHY AM I EVEN DEBATING THIS GUY?

Syphilis is spread by "skin-to-skin" contact, through anal, vaginal AND oral sex. Many people don't notice the symptoms or know they have syphilis. The initial sore is painless. The good news is syphilis is easily cured.

GET TESTED FOR SYPHILIS
