

Good Sportsmanship Is Important

Good sportsmanship is of most vital importance to Ashland High's mighty Grizzlies and faculty. Poor sportsmanship shows jealousy and a lack of confidence in your own team. Name calling is bad enough, but even this may lead to wild brawls consisting of everything from fists to brass knuckles. It may even involve hospitalization for the less fortunate.

Let's take the story of rough neck O'Lewel. He went to basketball game, vs. Klamath high school.

All was going neat, till he took a stool. He jumped up and yelled, Let's all be real cool." He shouted and boo'd; "Down with your school."

When all of the sudden, was threatened to a duel. He got a left, and a right, and a brass knuckle tool.

And that was the end of our rough neck, O'Lewel.

A school that goes to State and has all the fine qualities plus sportsmanship, will find that they are well awarded in the end with praise from all over the country. This situation involves no jealousy or the like as they deserve taking the lead.

Remember, good leaders are chosen for their fine qualities and good attitudes toward everyone!
—J. T.

Here is your Lonesome Oakie again with the first issue in nineteen fifty-eight. To put it bluntly, I didn't think I'd make it. Those semester exams almost got the best of me.

This brings to mind a question Mr. Wright asked one of his students recently. The question was, "Has absolute zero ever been reached?" The student quickly replied, "Yes, in my last exam!" How did you do?

Perhaps some of you have this attitude on the whole situation.

The more you study
The more you learn
The more you learn
The more you know
The more you know
The less you learn
The less you learn
The less you study
So why study?

It certainly sounds logical doesn't it? But always remember, education works — if the student works.

The new year always brings around another question of importance concerning a new year's resolution. What is a new year's resolution? According to Mr. Webster, new is defined as being "of recent origin, or having lately come or been brought into being." Year is defined as "a period of 365 or 366 days, divided into 12 months. The definition of resolution is "a formal determination, or to resolve." Have you made a new year's resolution yet?

I stumbled across something the other day called the "Seven Ages of Man" and I thought you might like to read it. Here is how it goes.

First Age—Man sees the earth.
Second Age—He wants it.
Third Age—He hustles to get it.

Fourth Age—He decides to settle for just half of it.

Fifth Age—He becomes even more moderate.

Sixth Age—He is content to have a six foot by two foot strip of it.

Seventh Age—He gets the strip.

Before I sign off, here is something with which I am sure some of you will agree. Student—I don't feel well. May I go home?

Mr. Lewis—Where do you feel the worst?

Student—In American Problems Class.

Ingenuity, Imagination Shown in Department

By Candy Hartshorn

When you walk into room 35 you know it isn't like any other class room in this school. You know it's something special, because there are so many drawings and pictures on display, and various craft pieces are arranged on shelves. Some thing indicates they are here for more than decoration. They are, this is the Art Department.

For the first time in four years AHS has an art department, now even more colorful than before, thanks to Mrs. Ruth Trost, instructor. Mrs. Trost majored in art at the Wisconsin College of Education, Milwaukee, Wisconsin, and received her Bachelors Degree there. She took post graduate at Layton Art School, also of Milwaukee, and then here at Southern Oregon College.

Your Career

By Pat Brewer

A new feature of the Rogue News is this career column. This month's column is aimed at students considering careers as beauticians.

REQUIREMENTS

A beauty operator is required to obtain a license from the state cosmetology board in all states except Delaware and Virginia. There is a small fee for the license, after the applicant successfully passes an examination in both theory and practice of cosmetology. She must be 16 to 18 years of age, have a health certificate, and have completed a cosmetology course in an approved private beauty school or a public vocational school. In a few states, the boards require that a beauty school graduate gain experience in a commercial beauty shop under a special arrangement of a junior operator before taking the examination.

There are more than 900 private schools, usually consisting of 1,000 to 1,600 clock hours of combined classroom work and practice in beauty service. Thus, besides learning the skills of the occupation, students generally take academic subjects offered in the four years high school curriculum.

ADVANCEMENT

You may advance by becoming manager of a large shop or by owning your own shop. Expansion in employment is expected to continue in this occupation because of the demands of the growing population and the tendency for an increasing proportion of women to patronize beauty shops.

SALARIES

The majority of beauty operators, working in a shop for an employer, are paid a basic wage plus a commission. However, some are paid only a salary or commission. Most employed beauticians work from 40 to 48 hours a week. Hours are very irregular. Some states have overtime pay provisions for hours beyond a specified minimum.

You can tell if a girl is in love with you by the way she looks at you when you aren't looking.

There are two courses offered, art and crafts and general art, which not only help students to develop their tastes and judgment in matters of everyday life, but also gives them an opportunity to exercise their imagination and ingenuity in working out creative problems.

If you would visit the art room at present, you would find some results of the semester tests: colorful, repeated pattern designs from the arts and craft class, and pencil sketches from the general art class. There are a group of drawings in the process of completion to be entered in the scholastic contest this month. These drawings show the results of a whole semester of art training, as do the many charcoal and watercolors displayed. This is surely one of the most interesting courses and certainly the most colorful.
