## Mr. Wright Wins Grant

Mr. Harry Wright, Ashland High School chemistry teacher, was chosen one of the top chemistry teachers in the United States. Because of this achievement, he has received a full year's tuition at Stanford University in California.

Out of 500 applicants only forty-five were chosen from the nation's chemistry teachers. Geographical location was one of the deciding factors in the selection. About 2 from each section of the country were chosen. The reason for this was so that the knowledge gained from this education will be spread across the United States.

Mr. Wright was selected on the basis of a 4-page application form. On the last page Mr. Wright had to tell what use this schooling will be to him and to other people. His past academic record and work he had previously were checked.

This grant is sponsored by the National Science Foundation at Stanford. The grant is good between September 1961 and June 1962.

The purpose of this grant is to increase the knowledge of high school chemistry and mathematics teachers and to introduce new material into their courses.

In addition to tuition, \$300 a month for food, housing, and other miscellaneous items will be granted. Books will be furnished free.

Mr. Wright will be on a leave of absence during the year he is gone. He will be at liberty to come back to Ashland High School after completing this schooling, if he so desires.
