Mr. Charles Presnow, living 3 miles east of Corvallis, has sold his 12 acre fruit and chicken ranch to Mr. Howard, of Montana. The consideration was \$2,400 and the deal was made by V. E. Watters.

Here's a chicken story that is a corker. A. C. Freeman, the plumber, has 12 hens and a one-eyed rooster and is now getting 14 eggs per day. He was sworn to the truthfulness of this statement on one of Ammy Cameron's best saddles.

The present weather is certainly a choice selection from the book of nature and the optimist and pessimist can unite on a common ground of rejoicing over the glorious rains. The growing crops are changing color and the owners' faces are wearing smiles.

J. Fred Yates delivered an address at the decoration services at Newport yesterday and while there took up a little legal business on the side. Fred is a close student and a hard worker. By strict attention to business he has built up a nice law practice and is deserving of success.

The Independent Telephone Company have prepared a reading and rest room for their operators. It is supplied with easy rockers, center table and lounges so that when the sweet telephone girl is not on active duty she may take the much needed rest. MANUFACTURERS BUILDING.

On the eastern side of Geyser Basin, at the Alaska-Yukon-Pacific Exposition, the handsome Manufacturers Building looks across the restless waters of the Cascades and the flashing foam of "Old Faithful," the reproduction of its namesake in Yellowstone National Park.

Its location is the most central of any of the exposition buildings, and its architectural design is especially fitting for the position it has been given. It was one of the first great exhibition palaces to be completed, and before the end of last year was ready for the reception of its vast collection of exhibits. It will house a magnificent assortment of the highest examples of man's ingenuity and invention, and within its walls will be gathered specimens of manufactured articles from the workshops of every nation of importance in the world.

It overlooks the finest of the formal gardens of the exposition, and its splendid line of pergolas, with their vine-covered columns and blossoming flowers, complete a restful and pleasing view. At no part of the grounds can be seen a more beautiful illuminating effect than is presented from the open pergolas during the late evening and early night. A million sparkling electric bulbs flash their white lights through the waters and, scattered throughout the greenery, hundreds of electrolights mingle their many hues with the riot of colors. Looking down the gentle slope of Rainier Avenue the floating craft of two lakes is brought into vision and adds the delights of a broad, light-sprinkled stretch of forest-enclosed waters to the whole effect.

THE CALIFORNIA BUILDING AT A.-Y.-P. EXPOSITION, SEATTLE.

California's handsome building is one of the very striking structures on the grounds of the Alaska-Yukon-Pacific Exposition. It is in the old Spanish Mission type of architecture encountered so frequently in Southern California, and the detail of its front has attracted the attention of artists and architects from all over the country.

In the building every county of the golden state will have an exhibit. California, from Siskiyou to San Diego, has shown as much enthusiasm for the Exposition as has Washington itself.

THE AUDITORIUM AT A.-Y.-P. EXPOSITION, SEATTLE.

Probably the most striking structure on the grounds of the Alaska-Yukon-Pacific Exposition is the Auditorium. It is builded of reinforced concrete, steel and brick and is a part of the rich legacy which is to be handed down to the State University when the Fair is over.

The Auditorium stands upon an eminence overlooking the main entrance to the Exposition grounds. It is now in use as a lecture room by the University Law School and for all assemblies of students. It has a seating capacity of close to 3000, which can be greatly increased.

PANSIES AND POSIES EVERYWHERE AT A.-Y.-P. EXPOSITION.

In the foreground of the picture is shown the bank which slopes up from Geyser Basin at the Alaska-Yukon-Pacific Exposition, Seattle. Upon it have been planted 300,000 tufted pansy plants, and close up to the ballustrades high-growing plants of bright blossom.

Above Geyser Basin can be seen the banks of the Cascades, and around these are growing 100,000 rose bushes, so selected that there will be a rotation of blooms throughout the Exposition.
