Comments by Mr. Blackwell. On Federal Aid to Education - "Local control of our schools has provided over 60,000 classrooms per year for the past 10 years. Of the 40,000 School Districts in the country, only one-half of 1% have reached their borrowing limits."

"The Free Enterprise System has provided us with the highest standard of living in the World. We are a great country, not because of our standard of living or the material possessions we have, but because of our ideals and principles. Only through the application of these ideals and principles to Economics and Government have we been successful."

"If we can't solve our problems on a local level, can we expect to send them to Washington to be solved there? Local Control is Better Control! We need representation in Washington that will guard our local interests and promote sound economic policies."
