

Your Horoscope for August 2014

By Stacey Lynn

August is a month of unexpected changes. Stay alert and know where your chicks are at all times.

Leo (July 23- August 22) This is a frustrating month for emotional Leo. It may seem that someone close to you is being deliberately difficult no matter what allowances you give them. Therefore allow your inner perception of love to rule your affairs. As love awakens a level of communication in others, you will feel compassion and understanding. Keep silent when words may hurt another. You will be the one hurt instead.

Virgo (August 23- September 22) People you have worked with before may not be around as much this month. Somehow they have disappeared from view so you will have to do organizational work alone. This is a unique time where you can improve finances and business. A financial high point of the year, it will be important for you to not clash with anyone or anything right now. Innovations will be the key to a profitable future.

Libra (September 23- October 22) Life may all be about work right now. But between moments of despair and elation you may have a moment or two of freedom to do the things that you socially need. This gives you a reprieve and it will allow you to be more creative at work. New people and friends are coming your way. You may receive many invitations the last half of the month. Discipline and dedication are keys to success.

Scorpio (October 23- November 21) The clutter in the household, the removal of all things old, the appliances that are either broken, dripping, or calling for immediate attention will take up all your time and attention. Best to just get on with it, these are your responsibilities and you must stop waiting for someone else to rescue you from your own creations. This is good though, you won't be seen as much by others right now. Be prepared for more things to break. Express yourself, but don't worry the family.

Sagittarius (November 22- December 21) Finances may take an unexpected turn. Be very aware of all costs, pay bills on time (especially right now), and attempt very clear communication with close intimates on all levels. What you love and what you say will not be recognized by others for a while. It is up to you to state clearly what you need. You may have to say it 3 times, (old Navaho formula). Do nothing foolish.

You could fall and injure yourself. The last week of the month could bring unexpected good luck.

Capricorn (December 22- January 19) You are many things to many different groups and you will be called upon by these groups this month. In one you are considered the wise person who can clearly articulate the inner needs of everyone. Do something special, a project, a journal, or telling hidden and scary secrets. You feel the pulse of things unsaid, say them. Finances begin to improve. Just be you and everyone will benefit.

Aquarius (January 20- February 18) Responsibility for the self will take on greater meaning in the next month or two. You must know that what is occurring is correct. Those great and deep pains and grief you're experiencing are allowing you to know yourself. Without the pain you would not be sensitive to what path you are to take next. Something old is ending and the new is about to begin. Saying the Great Invocation daily will help you to find a connection to the One.

Pisces (February 19- March 20) You may feel the need for a change of scene. You are feeling restless. You may be attempting to manifest something that you have been dreaming about for a long time. Continue to dream, but know that it is not yet in form. Maybe you should quit pushing so hard and stop forcing your will in places you have no power. Begin a savings plan, clean and maintain, and know that what you dream of will come when the time is right for the universe. Thy will not my will.

Aries (March 21-April 19) August is a month of major changes for you in many aspects. Do not fear the

unknown. You have secretly wanted to re-invent parts of your world that need to grow along with your own personal growth. It may seem too big to do, but if you just put your head down and do the work, it will be over with before you think about your suffering. Care for finances and tend to your grief. It won't last long.

Taurus (April 20-May 20) You will be in charge of many relationships at this time so you will have to practice the art of being democratic and be full of leadership abilities. You will have the need to change realities in the blink of an eye. Do not hide from responsibilities; big things are coming your way! Once communication problems are handled mid-month, nothing will dampen your spirits!!

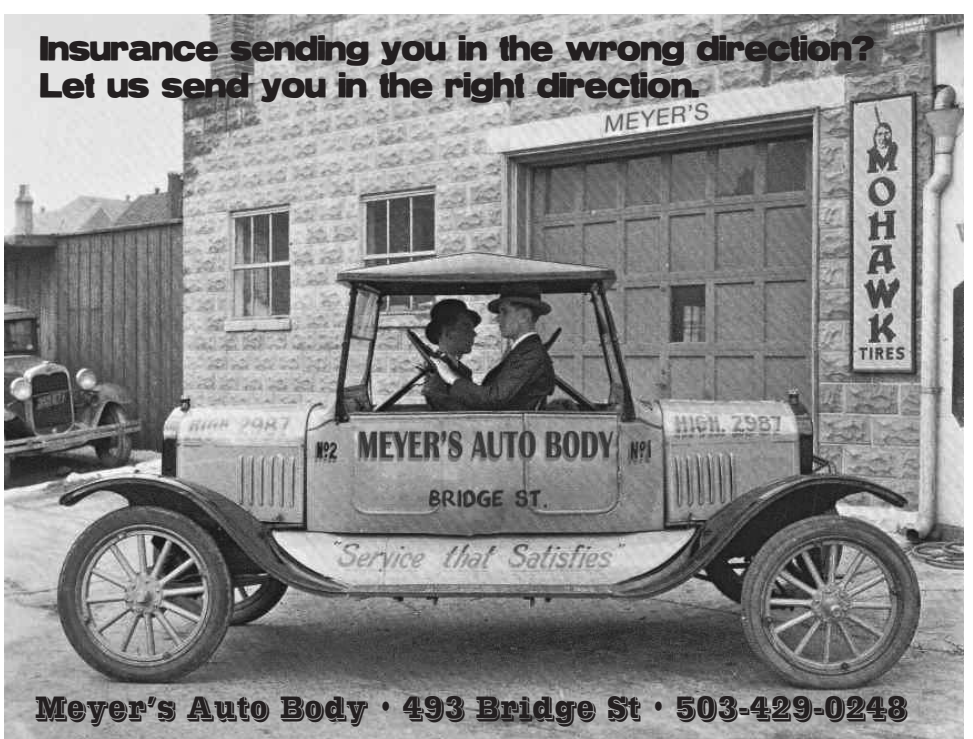

Gemini (May 21-June 20) August is about inner harmony for Geminis. This is a month of feeling what it means to be 'at home' with your family. It is important for you to be able to let down your guard emotionally. Figure out what you value. I don't think it is money, but now is not a time to take any financial risks. Look around your home and see if something is gathering cobwebs and change the energy of your home by selling or giving it away.

Cancer (June 21- July 22) Travel would do you a world of good in August. If things seem hidden or just not quite on the level, then your senses are on target. Plans, people, and money may not show up on time or when expected and prove frustrating. Know that this is a potent time where your imagination will have to take over. Before retiring, work the day backward and redo everything that didn't happen to your liking. This will comfort you until what is awry becomes balanced.

Vernonia's Voice is published on the 1st and 3rd Thursday. Our next issue will be out August 21st.
