

Your Horoscope for April 2015

By Stacey Lynn

Aries (March 21-April 19)

April will be more stable for Arians than March from the sentimental point of view, but it will stay at quite high emotional rates. After the agitation and initiatives that marked the previous month, in April it is time for reaping the benefits and enjoying. Beware: the tendency towards waste will also be there! Don't rush to make financial decisions and don't spend money on just anything that you come across!

Taurus (April 20-May 20)

You'll be sexy and sensual, especially in the first part of the month. Not only will you be ready to take initiative and start real campaigns to win somebody's affection, but you will also have the gift of attracting or seducing, sometimes even without the slightest effort. Don't push for your point of view to be accepted at any cost! Tact and diplomacy can bring you more benefits.

Gemini (May 21-June 20)

The first of April will favor long-term couple projects, solving problems, negotiating the tasks assigned to each of you, and joined involvement in social life, in collective activities, in studies, opinion sharing and trips. Venus will instill a cheerful and romantic mood in you, good for pleasures, fun and love. In the last two weeks of April, chance will be on your side and you'll enjoy satisfactions and fulfillment at the sentimental level. Beware of gossip, conspiracy and sabotage!

Cancer (June 21-July 22)

It seems that for a while you'll have to do what you are supposed to rather than what you like doing. For Cancer's career, April will be a great month. The planets will be in good terms with each other and will be ready to cooperate for your professional success. The Sun promises you success and recognition, and can bring you a prize or even a promotion. You'd better be vigilant where your health is concerned.

Leo (July 23-Aug. 22)

In the first two weeks of April, you can expect sentimental fulfillment that will be connected to distance, to the higher education, scientific, cultural or spiritual environment. You'll have a top period, dynamic and productive. Financially, April will be profitable for Leo, on the condition that you do not rush to decisions. The tendency

towards excesses can worsen the hyper-type ailments. Keep in mind that the strong have to be peaceable, wise and protective of the weak.

Virgo (Aug. 23-Sept. 22)

Virgos will worry a bit too much in the first part of April. Second part of April, the climate will be filled with eroticism, and Virgos' relationships will become much warmer. You'll make headway. Your projects will start taking shape, your work will become more efficient. Chances are you will get a very good deal on a purchase or get a raise. It is very important that you lead a balanced life and as disciplined as possible, without excesses and stress.

Libra (Sept. 23-Oct. 22)

Communication will be favored and important for your couple life. After April 11th you may take a romantic trip. Collaborations will permanently be on your agenda and new contracts might appear. You will feel the need to start something, to do business, to make an investment, take out a loan, collect funds, etc. In general, financial decisions will need to be weighed carefully. Use your spirit of investigation, which is very keen in this period!

Scorpio (Oct. 23-Nov. 21)

Things will be either white or black, you'll feel the need to clarify, to cut to the chase, to decide and take action. Starting April 15th, Mercury's transit will calm Scorpio's emotions down a bit and will try to lay emphasis on reason and communication. Scorpio's professional life will remain dynamic, but it will not be as pressing as in March. The second part of the month will favor material benefits which will come through other people. Bring your dominant/aggressive impulses under control and be more tactful!

Sagittarius (Nov. 22-Dec. 21)

After April 15th, you will have an appetite for conquests and gallant affairs. Love, tenderness and good understanding with your partner will be fully nurtured by the presence of Venus. Sagittarians will be extremely hard-working. Mars will energize you, will overload you with work and will throw various challenges your way: tasks that will require courage or physical effort. Now more than ever you will need physical exercise. Don't delay!

Capricorn (Dec. 22-Jan. 19)

You may do crazy things in the name of love. The atmosphere will become more playful, but also more unstable. Under such auspices, love can take you by surprise anywhere, anytime. You'll have a great capacity of expression. At the financial level you'll be OK in April, on the condition that you don't risk. Speculation and the attempt of getting money you haven't earned will be wasteful. If you have children, be patient with them and watch them attentively!

Aquarius (Jan. 20-Feb. 18)

You have a few very promising weeks ahead of you: passion, sexual fulfillment, homage and offers hard to refuse, maybe even a new love. It is possible, though, that you will have to deal with a family confrontation or a problem related to the home or to your partner's career. Patience! Money will go as fast as it will come. You'll have to calm down and relax. Having a creative hobby would be the most pleasant and efficient solution. Keep yourself informed! Information will lend you power and autonomy.

Pisces (Feb. 19-March 20)

You are drawn to intelligent, open, talkative people, from whom you can learn a lot, with whom you can share impressions. In your turn, you first and foremost conquer by the force of your ideas, by the passion with which you express yourself or by the way you transmit emotions in writing, rather than by the way you look. Don't rush to make statements and try to control your anger! Also accidents may befall you because your head is moving ahead of your body.
