A much smoother and more relaxing month. Summer begins in full swing.

**Cancer (June 21-July 22)** The whole month is pierced by the arrow of desire that motivates your actions and decisions. Also, the first part of the month is under the influence of seduction and romance, being particularly favorable for emotional fulfillment, finding love, happiness, understanding. Put your best on

## Your Horoscope for July 2016

display! It's an excellent time for launching and promoting.

**Leo (July 23-Aug. 22)** Financially, you're ahead of the game particularly during the second part of the month, but you shouldn't squander. During the first part of July you might not feel quite at 100%. You function pretty well, but need more rest and don't have great immunity. Get involved in solving family issues and take care of your home: repairs, redecorating, and so on!

**Virgo (Aug. 23-Sept. 22)** Jupiter is still in Virgo (until September), emphasizing the significance of life as a couple. You can gain extra money from intellectual activities, information or communication. Virgoans' physical endurance is diminished during the

last week of July, which must be treated with caution. Use your persuasive skills, but with tact!

**Libra (Sept. 23-Oct. 22)** Your view of life as a couple is pretty down-to-earth. You look at your loved one more likely through money-tinted lenses than happy-go-lucky ones. Or perhaps you're both driven to resolve some money-related issues. The second part of the month brings you popularity and the opportunity to find support for realizing your goals.

**Scorpio (Oct. 23-Nov. 21)** Your passion manifests itself freely, uninhibited. Your ideas are a lot easier to put into practice, your desires are easier to express and fulfill. Scorpios' financial status improves during the second part of July and that's also when the most notable achievements come your way. Find some important purpose and focus on achieving it!

**Sagittarius (Nov. 22-Dec. 21)** Marriage or amorous interests are among your top priorities. You're of a more romantic, tender disposition, and your sex-appeal increases. The first part of the month seems to be more difficult, both physically and in terms of state of mind, but you recuperate gradually, and the last week of July finds you with better morale and ready for action.

**Capricorn (Dec. 22-Jan. 19)** You lead a full and cheerful social life, you're attractive and romantic opportunities may arise at any moment. There's a chance of extra income, gifts, and other material gains. Buy something

nice after July 12: clothes, perfume, jewelry! It helps morale and could be a good acquisition. Your health may be suffering due to mental stress. Let go and let God.

**Aquarius (Jan. 20-Feb. 18)** After July 12 the relationship climate changes visibly for the better. The last days of the month bring you the most important and hopefully the happiest moments. Aquarians' love life is now marked by opportunity and communication. Financially you need to steer clear of waste and carelessness. Be social, set up meetings with friends and colleagues, meet new people!

**Pisces (Feb. 19-March 20)** It's a superb time for sprucing up an existent relationship, the blossoming of a new one or the start of a future one. Make the most of the first 12 - maybe even 14 - days of the month. Use your head, communication abilities, imagination and talents, because through them you'll gain success and money! Set your most important targets and focus on them! Show discipline!

**Aries (March 21-April 19)** Don't be surprised if you experience unorthodox desires or yearn for intense experiences! July stimulates your creativity and at the same time is excellent for presentations, launches, promotions. It's a good time for intense physical activity, for recreational or entertainment-oriented travels. Enjoy today and don't worry about small or insignificant things!

**Taurus (April 20-May 20)** July is the month during which some issues concerning Taureans' relationships are solved, a situation is settled, things are cleared-up. You have the ability to set others in motion, to get them interested in energetic, decisive, efficient action. It wouldn't hurt to make an effort to be more active, preferably outdoors, in nature. Steer clear of bickering or aggressive people!

**Gemini (May 21-June 20)** Things are complicated, but they're better than during previous months. You deal with big workload, short deadlines, emergencies, challenges, and various small incidents, but things go well. On the other hand, you should be cautious, because there's a risk of injuries, accidents, or painful manifestations. Communicate, be very active, meet new people, discover new places!
