

Your Horoscope for June 2017

By Stacey Lynn

Things are moving ahead quickly with constant changes occurring. Those who adapt will win. Those that don't will be confused and noneffective.

Gemini (May 22-June 21) Others are drawn to you like a moth to a flame. You feel amazing in your own skin. Romantic proposals abound but you have to be willing to go there. Excellent time for career. Some things don't go as planned but you have what it takes to succeed. Don't take risks or overindulge. Promote your image, product or talent.

Cancer (June 22-July 21) A lucky month for you. There are responsibilities or limitations but once handled your relationships go well. You are in a goal oriented and competitive mindset. Success is likely the last 2 weeks of June and money comes to you. Relapse of old afflictions or injuries are possible. Do not rush into things. Think twice before acting.

Leo (July 22-August 21) Contradictions, inconsistencies or delays may plague Leo relationships. You also may be setting the bar too high. Don't worry, any inconveniences are short lived. In career matters, any adversity can be overcome with patience and perseverance. Focus on what you can control. Steer clear of enemies and dangers that may be lurking.

Virgo (August 22-September 21) Virgos love life is status-quo. Solid relationships go much better than affairs and newer relationships. Virgo men have the advantage. (Not so emotional.) The first two weeks of June are good for success and money. Work could become tough mid-month. Be careful when traveling. Set your objectives and go for it!

Libra (September 22-October 22) Money and career dominate your mind leaving little time for romance. Communication blockages can cause concern. Luckily these unpleasant things won't last. If you accumulate stress it may lead you to excesses. Time for self-analysis and working with your subconscious. Get something nice for yourself or your home.

Scorpio (October 23-November 21) Luck in love.... Not only do you have much affection to give, you also attract a lot of affection. Career connects with studies, travel and spiritual pursuits. This is a good time to work with financial institutions. Medical issues aren't necessarily in sight but more like an increased sensitivity that requires you to protect yourself more.

Sagittarius (November 22-December 20) Your loved ones get all of your attention but your love-

life most of all. Professional success largely depends on team work and how you interact with those around you. Where your head is at brings either success or loss and tension. Massage, music, aromatherapy, anything relaxing will help your mood.

Capricorn (December 21-January 19) A month full of sensuality and burning feelings. With sex appeal and luck in love, you can begin a new relationship or improve your current one. Despite small obstacles or delays, June is efficient and productive. Calm and diplomacy is needed in the area of contracts and collaborations. Get out with old friends.

Aquarius (January 20-February 18) A favorable month for romance. You are ready for anything that brings you joy. An increase in your drive for work makes you more dynamic and efficient. If faced with issues be brave and quick to act. Careful, there is a possibility of being involved in an accident or suffering injury. Prepare a romantic dinner or snaz up your bedroom.

Pisces (February 19-March 20) Your disposition is sweet and romantic. You may find yourself on a short romantic trip. Fun seems more interesting than work but may create financial pressures. Waste and risk need to be reduced. A tiring month so you must take care of yourself. Issues arise from an unhealthy lifestyle so start a workout program. Read, write or paint!

Aries (March 21-April 19) Not a romantic month. Practical or financial concerns take a front seat. Income increases and there is potential for re-

ceiving gifts or bonuses. With home and property make repairs, redecorate or maybe move. Issues with landlords, tenants or parents are possible. Meet new people and widen your circle.

Taurus (April 20-May 21) A pleasant emotional month. Relationships improve or you can begin a relationship rather easily. A favorable time for romantic correspondence or travel. Rise to any work challenges, once you handle responsibilities luck will be on your side. A great time for settling health related issues. Be very careful with expenses.
