

# Your Horoscope for July 2017

By Stacey Lynn

There will be many opportunities for everyone to practice patience and deep contemplation. Challenges are ahead.

**Cancer (June 22-July 21)** Be aware of reckless emotional behavior, it could entangle you in an unpleasant situation. When presented with opportunities or challenges, get fully involved and trust in success. You have the stamina to reach your goals. If you are cranky then take a break! A race or competition may do you good.

**Leo (July 22-August 21)** Might as well take a two week vacation the first half of July. Not much is happening and besides, you don't feel like working anyhow. Communication is very important in your relationships and may lead to something fun. Things improve financially. Get more rest and care for any health issues.

**Virgo (August 22-September 21)** Some relationship pressures appear early in the month, but you will achieve something noteworthy. Romance is better at month's end. Luck is with you career wise. There is something going on behind the scenes that you will become aware of. Take your health seriously. Focus on what really matters.

**Libra (September 22-October 22)** Status, prestige or even fame may interest you now. A couple's efforts toward social ambitions or a joint goal are successful. Study and travel are linked to career now. Approach things with humor and don't get too worked up. It is important for you to find ways to unwind.

**Scorpio (October 23-November 21)** It is a time of digging deeper in relationships to understand the depths of things. There may even be deep secrets. Work is busy and demanding. Because your stamina is low, you run the risk of accidents or injuries. Joining a group with many members to interact with could be fun!

**Sagittarius (November 22-December 20)** Relationship happiness is near by. Something wonderful and exciting is coming. A time to be careful with money decisions and transactions. Do not spend without thought. In career, analyze your situation and pay attention until fall. You may be making a change. Health is best at month's end.

**Capricorn (December 21-January 19)** July will be hot and full of romantic energy both highs and lows. Passion or war, it is all or nothing. Things lighten up at month's end. There's achievement and opportunity as well as

stress and agitation at work. Be careful who you allow around you. Save money, you may need emergency funds.

**Aquarius (January 20-February 18)** Through stimulating conversation you have the power to seduce. You are only interested in quick-wit and eloquence. Decisions are dictated by logic and objectivity. Unless you have scheduled a vacation, you have much work to do. Plan your work schedule and find ways to relieve stress.

**Pisces (February 19-March 20)** A month of romantic drive and passion. Love can suddenly burst into existence when you least expect it. There is luck surrounding investments. Keep an eye on nervous and respiratory systems. Do not over spend on entertainment, pleasures or hobbies. Creativity is at a high.

**Aries (March 21-April 19)** Let your creativity run wild. Start work on repairs, tidying up at home and redecoration projects. Avoid risky or conflict ridden situations. Even if there are some hurdles in relationships, luck is on your side. When working with others, be patient. Evaluate the consequences of your decisions.

**Taurus (April 20-May 21)** Sometimes it's best to be silent. Relationships may be tense. Snide remarks, acting tactless and impatience doesn't help; particularly July 9th, and the 16th. Finances are unbalanced and work may be stressful. You experience moments of sheer luck. Learn something new.

**Gemini (May 22-June 21)** Romance is in season and you both seem to be on the same page. July is stressful but full of luck and achievement at work. Perspective and moderation are necessary in finances or you could have big losses. Your mood is excellent but do not overlook health issues no matter how small they seem.
