FINANCE CORPORATION TO BACK FARMERS

Trade Magazine Says Banks Can Get Money on Short Notice for Farmer Patron.

Editorial in the December issue of "Farm Machinery Farm Power":
"So many complaints have been received from dealers relative to the shortage of money in agricultural sections; the impossibility of securing funds for financing farm purchases; that country banks have loaned to the limit, etc., that it is high time that the dealers join forces with their farmer customers and respectfully but forcefully inform the bankers that the latter can secure additional funds through the War Finance corporation, if they will but make application and are able to show that they have advanced money for agricultural purposes."
"The War Finance corporation is not a vague, distant government agency requiring months in which to function. The St. Louis committee received an application on Thursday of last week and by Monday the loan was authorized from Washington. Equally efficient are other district committees already appointed in most states."
"Every dealer should arm himself

with the following facts:
"The War Finance corporation, through government action, makes available one billion dollars for agricultural purposes."
"To render these funds quickly available, committees are being appointed in agricultural sections. These committees, familiar with local conditions, pass on the loans and make recommendations to Washington."
"The plan provides that loans may be made to any bank, banker or trust company which may have made advances for agricultural purposes, a recent ruling stating that this includes loans made to farmers for the purchase of farm implements."
"The purpose of this plan is to fill the gap between the short time paper accepted by the federal reserve banks and the long time loans made by the federal farm loan board."

WAGES DROP FROM 30 TO 50 PER CENT IN 18 MONTHS

Wage reductions ranging from 30 to 50 per cent in the past 18 months are shown in a comparison of wages paid to various classes of labor in Oregon compiled by C. H. Gram, state labor commissioner.
Farm hands, who were receiving an average of \$73.62 a month, with board, in June, 1920, were receiving an average of but \$37.16 a month and board in December, 1921, a decrease of almost 50 per cent, the compilation shows. Carpenters, receiving \$7.14 a day in June, 1920, were receiving \$5.19 a day in December, 1921, a decrease of slightly less than 30 per cent. Teamsters' wages dropped in the 18-month period from \$5 a day to \$3.52; head fallers from \$7.12 to \$4.69; second fallers from \$5.71 to \$4.43; laborers from \$4.95 to \$3.52; camp cooks from \$157.69 a month and board to \$96 a month and board; dishwashers from \$77.25 a month and board to \$53 a month and board; milkers from \$88.32 a month and board to \$59.23 a month and board. The compilation shows the greatest percentage of decrease between June, 1920, and June, 1921. In the last six months the variation has not been so great, except in the case of carpenters, whose wages have been dropped from \$6.18 a day to \$5.19 a day. Wages of common labor show a slight increase in the last six-month period, from \$3.22 a day in June, 1921, to \$3.52 a day in December.

Those who attempt to follow out the Savior's advice about doing unto others as you would that they should do unto you, should make up their minds in advance that they are going to be imposed upon unmercifully.

GAME COMMISSION IS AFTER WOLVES WITH POISON

State Warden Agrees With Statement Made in Recent Story in The Sentinel.

The state game commission is taking active measures to rid the country of wolves and two expert trappers are working south from Oakridge putting out poison bait and should not be close to the June mountain section where, according to a story recently published in The Sentinel, a large number of deer have been exterminated by wolves. A communication from the commission states that the poison work is being carried on.
State Game Warden Burghdoff agrees with the story published in The Sentinel to the effect that only by poisoning can the wolves be exterminated and also that the wolf is the worst natural enemy of the deer.
Warden Burghdoff states that his department is getting onto its feet financially and will in the future be able to carry on more extensively its
