"How do you look?" and "How do you feel?" are the vital questions.

If you are enjoying good health and eyesight, then you are indeed fortunate.

If you are handicapped with poor eyesight, we can be of invaluable service to you, because it's the purpose of our business to improve the vision of people in every stage of life.

If you need glasses for close work and distant view, KRYPTOKS will help you. They are mighty convenient and useful because two visions are invisibly united in one pair of solid lenses with no seams to show that they are bifocals.
