

The Farmer Is Extravagant A Talk Straight From the Shoulder

The average farmer is the most extravagant liver we have. His living costs him more than it does any other average citizen. We are not making this statement ourselves—we are taking the word of the average farmer who states that all he gets from his labor is a living for himself and his family. Of course it is a good living—to which he is probably more entitled than any other citizen—but we can think of no other business where the average member of that business states that his entire earnings go to keep up the family expenses.

Possibly this is because the average farmer considers his occupation a profession. He should give it a new name. His occupation is a business, and requires business sagacity in its conduct.

The farmer, probably more than any other class of citizens, hollers for cutting down the overhead in the conduct of government. He has good reason for his hollering, but he should also cut down the overhead in his own business to a point where he is left a fair profit every year.

About the only way in which he can do this is to cut down the time it takes to perform his work, which cuts down his payroll and leaves as profit that which he has been needlessly putting into the cost of production.

The entering wedge is a Fordson tractor—and if you give a Fordson the least bit of a chance it will go all the way.

The next step is a Ford one-ton truck with which to haul the products to the city and bring the supplies home. It saves the high overhead which goes into the farmer's transportation problem, has all the merits of the Ford car, multiplied by greater capacity and greater strength. Always gets there and gets there in a hurry.

Bring your Ford ears to us for the few necessary repairs and thus get genuine Ford parts and reliable Ford workmanship by Ford specialists.

The Cost of Rotting Buildings now running into millions

A **ROT**TING building is absolute waste, because a small investment in paint will save it. A building that is not protected by paint must either be rebuilt or repaired in a few years at a costly figure.

Check the costs. Compare the prices of paint and lumber. Can you afford to bear the expense of rebuilding or repairing your home, when to save it costs so little?

When you paint, make an additional saving by using the best paint. It spreads easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

But more important, the best paint serves five or more years longer than "cheap" paint.

The best paints are scientific in formula and preparation. We've been making them for 73 years.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.

There are times when we wish there was more truth in the old saying that tomorrow never comes.

A man who keeps his religion always with him and still makes no untoward attempts to display it, is admired even by the scoffers.

Whenever someone else makes a mistake that you have never made, you think how foolish it is—but when you make a mistake you think, "Well lots of other people have made worse ones."

If a man's actions did not betray him the number of criminals captured would be much fewer.

IT BUILT UP HER STRENGTH AFTER THE FLU

Again Like Old Time Self. Seattle Woman Says Tanlac Is Just the Thing for Those Who Suffer as She Did.

"I believe the 'flu' saps the vitality of everybody who has it. I know it did mine, and I never got my strength back until I began taking Tanlac," said Mrs. F. Read, 1125 North 83rd St., Seattle, Wash.

"I wasn't only weak and run down, but I also suffered a great deal from hemorrhoids and no matter how little I ate, I was miserable for hours afterwards."
"Since taking Tanlac I eat anything I want, my digestion is splendid and I feel like my old self again. I think it is only my duty to recommend Tanlac to those who suffer like I did."
Tanlac is sold by all good druggists.
