OPTICAL SERVICE

This means more than the mere supplying and fitting of glasses. Of greatest importance is the examination which determines the success or failure of an attempt to make your eyes more useful and comfortable.

In order that your glasses fulfill all the requirements expected of them, the examination of your eyes must be accomplished by an experienced optical specialist. My increasing clientele is sufficient evidence of the ability with which examinations are made.

If you need glasses, I shall be glad to make an appointment at your convenience.
