HAD TO SPEND MOST OF HER TIME IN BED

Seattle Woman Says She Tried So Many Medicines Without Results That She Was on Verge of Despair; Now Well and Happy.

"For a year before I began taking Tanlac I had to spend most of my time in bed, so I know how to appreciate the splendid health I now enjoy," said Mrs. Inga Gephord, 334 Second Ave., Seattle, Wash.
"I had tried so many things for stomach trouble that I was almost in despair, but nothing gave me relief and if it hadn't been for Tanlac I don't know what the result would have been. My kidneys bothered me a good deal, too, and I got very little rest either day or night.
"Only a wonderful medicine could do what Tanlac has done for me. There is something about it, I don't know what, that seems to take hold of a person and give them new life and energy with every dose, at least that is what it has done for me."
Tanlac is sold by all good druggists.

"We believe ZEROLENE is the most efficient lubricant made for the modern automobile engine. If it were possible to make a better oil than ZEROLENE this company would make it."

The President of the Standard Oil Company (California), author of the statement quoted above, is right in believing that Zerolene is the best motor oil made. The lubrication engineers of this company have proved it repeatedly, by means of thousands of dynamometer and road tests of Zerolene and competing oils.

The reasons for Zerolene's superiority are: First, that the Standard Oil Company (California) possesses resources of crude oil and of manufacturing equipment and personnel that are unsurpassed in the entire petroleum industry. Second, that the engineers and chemists of this company have, from the beginning, been given carte blanche to make full use of these exceptional resources, and to spend all the time and money needed to develop a lubricant ideally suited to the needs of the modern internal combustion engine.

At the President's request, we are undertaking to tell the motorists of the Pacific Coast the story of Zerolene. We shall do this by means of a series of signed statements in the public press. These statements will set forth in plain language the requirements of an efficient motor lubricant, and the detailed reasons why Zerolene meets these requirements perfectly.
