

## HALF MILLION BLOCK OF BONDS ADVERTISED

County Court Finds Market for Paper Is Good and Plans Much Constructive Work.

Half a million dollars more of Lane county's road bonds will soon be sold, the county court having made an order Monday to advertise the sale of a block of this size. With the issuance of this block of bonds \$1,000,000 of the \$2,000,000 issue voted by the people two years ago will have been sold.

The bond market at the present time is good, according to advices received by members of the county court, and it is believed that a premium may be received for an issue of this size. Lane county bonds that have already been issued are now selling in the open market at 103%, according to information received from Portland. The opinion was expressed that in offering a large block much better bids will be received.

Out of the additional half million dollar issue \$150,000 will be taken for the county's share of the construction of the Rainier-Blaichly section of the Eugene-Florence highway. The county court signed the contract with the forest service Monday afternoon agreeing to pay half the cost of the work provided the contract does not go over \$300,000. The court also adopted a resolution appropriating the sum of \$150,000 for the work and everything is now ready for the letting of the contract as far as the county is concerned. It is expected that the forest service will advertise for bids at once and that work will be started within a few weeks.

It is likely, said county officials Monday, that it will take two seasons to finish this road, as the project covers 24 miles and some of it is very heavy construction. Ten miles of it is within the Siuslaw national forest and 14 miles outside.

### DETOUR AROUND PAVEMENT ON HIGHWAY IS PUZZLE

What will be provided as a detour around the paving job on the Pacific highway between Goshen and Creswell in Lane county this summer is puzzling the members of the county court and the road officials. Last summer while a stretch of the concrete pavement between those towns was being laid and allowed to season all traffic was detoured around it for a number of months by way of the Coast Fork bridge and the Cloverdale country, but this route will not be

available this summer for the reason that the road between the Coast Fork bridge and the site of a proposed bridge across the same stream opposite Creswell is to be macadamized this summer and will be torn up during a greater part of the season.

Members of the county court have suggested that a temporary roadway alongside the pavement on the highway be built or that cars be detoured through a pasture on either side of the highway and a temporary bridge be built across Camas swale.

There is a stretch of about a quarter of a mile just south of Goshen and two stretches aggregating over half a mile in the Camas swale section that will be paved with concrete this summer, this being a part of last year's contract, but it was necessary to make a fill at these points and allow it to stand a year before the pavement could be laid.

### WASHINGTON INTERESTED IN COUNTY BONDS

Senator Stanfield's Secretary Writes and Points to Disaster That Would Follow Repeal.

E. J. Adams, of Eugene, secretary to Senator Stanfield, writes from Washington in connection with the proposed repeal of the county bond issue. Outside of the bad feeling that would prevail in those parts of the county which have gotten little or none of the bond money, Mr. Adams calls attention to the fact that the repeal of the bonds would mean that Lane county could not match federal funds which alone will amount to a million dollars for a period of a very few years.

Mr. Adams calls attention to the fact that only through good roads can we look forward to the intensive development of agriculture and of the tourist crop. The latter he says should within a few years amount to millions annually for Lane county alone and from this crop we should expect many to locate permanently and assist in paying off the bonds.

Oregon can look forward to a development during the next 10 years that will far exceed the development of the past 25 years, according to Mr. Adams, but we have got to give a square deal both to those who are here and to those we expect to come.

### DORENA.

(Special to The Sentinel.)  
May 2.—Mrs. William Cellers, of the Grove, spent Monday evening at the C. A. Van Schooneck home.

W. W. Watson motored up from Eugene Monday to the C. A. Van Schooneck home, returning home Tuesday evening.

Mrs. Glen Scott returned home Thursday from Eugene, where she had been receiving medical treatment.

J. W. Kirk, of the Grove, came out to the J. H. Kirk home Sunday.

Mr. and Mrs. Fred Jones and daughter Lucille motored up from Marcola Sunday and spent the day at the Warren Kelly home.

Mrs. Edna Sullivan, of Eugene, spent Sunday at the J. H. Kirk home.

Bob Comos and Benetta Teeters motored up from Eugene Friday night to the Chas. Teeters home.

Mrs. J. Q. Willis, of the Grove, is spending a few days at the J. H. Kirk home.

Mr. and Mrs. Clay England and children, of the Grove, spent Sunday afternoon at the C. H. Jennings home.

Mr. and Mrs. John Holstrom, of Marcola, were called up to the J. H. Kirk home Sunday morning by the serious illness of Bertha Kirk, who died Sunday afternoon from pneumonia.

### SAGINAW.

(Special to The Sentinel.)  
May 2.—Those from here who attended the meetings at Eugene Sunday were the F. M. Adney family, Mrs. Gray and brother, Ray Cornack, and the Bartlett Johnston family.

Mr. and Mrs. Carl Gerrard, of Springfield, visited Monday at the S. H. Jarrett home.

Quite a number from here attended the lecture at the Christian church in the Grove Saturday night.

Mr. Adney went down to his farm near Drain Monday with a load of furniture. They are moving there for the summer.

Mrs. F. T. Benston and Harry were in the Grove Saturday.

C. E. Whiteley and Mrs. A. E. Scott were in Eugene Wednesday of last week.

Mrs. A. Cornack spent the week end in Eugene with her daughter, returning home Monday evening.

Etta Scott went to Eugene Tuesday evening.

Mr. and Mrs. Hugh Wells and children, of Roseburg, called at the Leonard home Monday.

Terry Moody and Lyle Leonard attended church in the Grove Sunday evening.

Mrs. Judson Allen and son Don went to Sutherlin Saturday.

### HEBRON.

(Special to The Sentinel.)  
May 2.—A rag carpet sewing was held at Miss Anna Jepson's Saturday afternoon. Those present were Mrs. J. A. Powell, Mrs. B. M. Kappauf, Mrs. Bella Taylor, Mrs. G. M. Keibelbeck, Mrs. J. Q. A. Young, Mrs. Jessie Gilerist, Mrs. Walker, Mrs. L. G. Markham, Miss M. J. Piper, Annabell and Katie Gilerist.

Mr. and Mrs. J. A. Powell, Mrs. B. M. Kappauf and Mrs. G. M. Keibelbeck motored over to Divide Monday evening.

Mr. and Mrs. G. M. Keibelbeck and children and Mrs. J. Q. A. Young motored out to the Grove last Wednesday evening to attend church.

Miss Laverne Lamb went to Eugene Saturday to spend the week end with her parents.

### ROW RIVER.

(Special to The Sentinel.)  
May 3.—Mr. and Mrs. "Shy" Huntington, of Eugene, were Sunday visitors at the LaSells Stewart home.

Mrs. Joe Panazzi and Mrs. Frank LaBlue left Friday night for Fairfield,

Okl., being called there by the serious illness of their father, W. S. Smith.

Mrs. Daniel Bentle, of Grants Pass, spent Sunday and Monday with her mother, Mrs. Ellen Owens.

Mr. and Mrs. Charles Ellinger, en route to their home at Medford, from a trip to Portland, visited briefly with Mr. and Mrs. S. S. Trask Monday.

The Trasks and Ellingers were neighbors in Minnesota years ago.

Mr. and Mrs. Thomas Queen, of Saginaw, are staying at the Frank Pleunard home.

Faye Stewart, son of Mr. and Mrs. LaSells Stewart, dislocated one of the bones in one hand in a fall Friday evening. He was taken to the Grove, where his injury was attended to.

### LIBRARIAN MADE GOOD GUESS

Mystified at First, He Finally Realized Just What Volume the Lady Was Looking For.

The recent death of John Kendrick Bangs has recalled an incident that happened recently in one of the branch libraries. A woman entered one evening just before closing time and after wandering aimlessly about without finding anything that seemed to please her, finally came to the desk to consult the librarian concerning her need. She said that a friend of hers had recommended a book as being especially good, and would the librarian please tell her where it was kept. The name of the book, she said, was "The House Built on the Sticks."

The librarian looked puzzled. Visions of certain Biblical references to houses built on the sands came to mind, but this one was unfamiliar to her, so she set about questioning the woman to find out more about it. No, the woman didn't know what it was about, but she did remember the author's name, Bangs. Immediately there came an illuminating idea, and the librarian went to the shelf and took down Bangs' "Houseboat on the Styx," and sent a satisfied patron home to enjoy her newly found treasure.—Indianapolis News.

### ODD PLEAS MADE TO JUDGE

Defendants in Berlin Court Evidently Were Not of the Ordinary Type of Malefactors.

A strange request has been made in a Berlin court by a blacksmith, Paul Walter, who has been passing himself off in Berlin as Prince Piess. He and four friends were on trial for burglary and the blacksmith demanded:

"I request that I be condemned to death; if not, then send me to prison for life, so that I shall be rendered harmless to society."

When the surprised judge said he could not grant such a request Walter said:

"Well then, put me under police supervision for 20 years and I think you will see I won't do anything wrong again, but will reform myself. If I don't, then sentence me to death next time."

The judge sentenced him to prison for 18 months and passed sentences varying from three months to two and a half years on the others. All the prisoners then thanked the judge, and the blacksmith added that he and his friends gladly accepted the sentence.—New York Tribune.

### Best Way to Warm His Hands.

During a severe winter, a science lecturer was delivering an address to a very small audience.

Presently a shabbily dressed man entered the hall. It was apparent that the man appreciated the lecturer's remarks, for he had not been listening many minutes before he began to applaud vigorously.

His enthusiasm stimulated the rest of the audience, and from that moment the applause grew frequent and unanimous, and the remainder of the lecture passed off splendidly.

The lecturer, feeling grateful for his apparently enthusiastic listener, accosted him as he was leaving, and exclaimed, heartily: "I was delighted to notice that you appreciated my remarks."

"Appreciated nothin'" said the man. "I didn't even know what you was talkin' about. I seed the lecture was free, an', as it was cold outside, I came in. I was clappin' to warm myself!"—Philadelphia Inquirer.

### "Setting" Colors.

All colors cannot be set by the same method. Salt, for instance, is extremely effective in setting blues, pinks and some reds. A large tablespoonful is required to a gallon of lukewarm water. Black cottons or black-and-white checks need stronger salt water to be effective, and sometimes a little turpentine may be added to the water. Soak the materials in lukewarm water. Soak browns, deep yellows and tans in a solution of one cupful of vinegar to a gallon of lukewarm water to set the color. When the lighter shades of yellows and tans become faded, the color can be restored by adding strong coffee to warm rinsing water.—From the Designer.

### Car Needed It Most.

The little librarian sat at her desk surveying the row of solemn-eyed Italians before her. Tony had brought all his little brothers and sisters to see the "teacher." "My goodness," she said, "how many of you are these altogether?" "Eleven," said Tony, and the entire row grinned broadly, exhibiting beautiful pearly teeth. "What beautiful teeth! I suppose you all brush them well every night?" A nervous shuffling. Tony cleared his throat. "Well," he said earnestly, "we did have a brush once, but father needed it to clean something in the car and after that it wasn't much good."—Chicago Journal.

### HAS DISCOVERED NEW FORCE

Londoner Gives Interesting Description of Manner in Which He Made Important Find.

A simple carbon rod has been discovered by A. E. Baines, a leading galvanometrist of London, which if held in the hands five minutes will recharge the human system with nerve energy that lasts 12 hours. He says it is nothing new, but, on the contrary, was known to the ancient Egyptians. He said the secret of it was lost many centuries ago. Mr. Baines said that years ago while he was standing in the British museum before a painted limestone sculpture of Kharfra, an Egyptian king of the fourth dynasty, who built the second of the great pyramids of Gizeh, he noticed the figure was holding two small rods shaped something like the grip on a bicycle. Thereafter he began a series of long experiments to discover the substance which the king held, but he failed in his search until one day when he was trying to improve the microphone, for which he prepared several carbon pencils which had been hardened by a special process of his own. He said that quite accidentally he touched one of these carbon pencils and was surprised to find that his galvanic deflection swung from positive to negative. This led to further experiments, and he finally found that the ordinary arc carbon, when hardened by his process, gave out a force which could not be distinguished from nerve force. The bars are about six inches long and are capped at the ends with celluloid. Mr. Baines asserted the carbon rods have been of great aid in treating cases of nervous breakdown, deafness, anemia and many other complaints. He declared he did not know what the new force was.

### MRS. KOLTSKI NOT TO BLAME

Her Testimony Showed That the Dog Had Deliberately Disregarded Orders She Gave Him.

Judge Oscar Hallam, in his address before the South Dakota Bar association, told this good one:

"I recall a case of assault and battery, against the Koltski family, and in the course of the examination it developed that the Koltski family dog had taken an active part. Mrs. Koltski, when on the stand, was asked if she didn't instigate the activities of the dog. She insisted that she did not. The attorney said: 'Didn't you say, "Sic 'em, Caesar?" for that was the dog's name. She said, "No, I did not."'

"The attorney said, 'You said something to the dog?'

"She replied: 'Well, what if I did?'

"He insisted: 'Tell us what you said to the dog.'"

"She answered: 'Why, I said, "Don't sic 'em, Caesar."'

### Unsuspected Knowledge.

The woman has a young college graduate friend who is just entering the business field. Louise has poise and educational background, which she disguises beautifully by means of a pair of big blue eyes, homemade pink cheeks and a mop of bobbed brown curls.

She does not know whether to call her latest experience a compliment or the reverse.

Yesterday Miss Isabel, the chief stenographer, dashed into Louise's office, notebook in hand, and made for the big dictionary, gasping in her flight: "What on earth does m-o-d-u-s-o-p-e-r-a-n-d-i mean?"

"Method of procedure," said Louise neatly from her desk.

Miss Isabel sniffed faintly and dived into Webster. In a moment she was out again and looking dazed.

"It does mean method of procedure!" said she. "How on earth did you know that?"—Chicago Journal.

### Hears Concert in Bed.

The acme of comfort and convenience in the hearing of wireless concerts has been achieved by Ronald Gurd, an amateur operator of London, Ont. By using a little originality he is now able to lie and listen to the reproduction in his own room of music played several hundred miles away.

Bed springs solved the problem for Mr. Gurd, who realized that the supports of his mattress made excellent terminal connections. He capitalized on his knowledge by eliminating the outdoor aerial wires over his home. One end of the springs is grounded and the other end is used for the attachment of the receiving instrument and the sound amplifier.

### Shrunken Body Is Two Feet Tall.

Preserved better than many an Egyptian mummy, a shrunken body of an Indian chief who died more than 400 years ago has been brought to the United States by Juan Kratiel, a Peruvian engineer. The mummy is only 25 inches high, for the body was shrunken and preserved by a secret "pickling" process known only to the South American Indians.

Tradition records that this is the mummy of Karruba, a Peruvian chief who led his tribe against the Spaniards in 1535. The beads worn by Senor Kratiel were found with the shrunken warrior.—Popular Science Monthly.

### Rare, Flawless Emerald.

"Emeralds are very seldom found without some small defect," said a jeweler in the West End of London. "Pearls, diamonds and rubies can all be obtained perfect in thousands of cases, but an emerald such as the one in Princess Mary's ring is an altogether exceptional stone." It is known among jewelers as a "specimen gem," an exceedingly rare one, and is set in platinum.

## TIPS BEAM AT OVER 100 FIRST TIME IN YEARS

I Will Never Be Without Tanlac Again, Declares Little S. F. Woman—Tells of Remarkable Recovery.

"I will never again be without Tanlac, even if it takes my last dollar to buy it," said Mrs. Georgia Halfpenny, 262 Myrtle St., San Francisco, Calif.

"Five years ago I struck my side a blow that kept me in the hospital for weeks and put me in a terribly weak, nervous and run-down condition. I had no appetite, and my digestion was so poor I would have terrible cramping pains in my stomach, and I would float up so that my heart palpitated like it would jump out of my body. I was dreadfully constipated, had splitting headaches, and my back seemed like it would break into.

"But Tanlac has put an end to all my troubles. I've gained sixteen pounds too, and it's the first time in years I've weighed over a hundred. I can never praise Tanlac enough for the splendid health it has given me."

Tanlac is sold by all good druggists.
