The Steam Elephant

There are many seasons for a Fordson Tractor. There is no season when a farm can afford to be without a Fordson. Just now you should plan on using a Fordson for cutting grain and hay. The heat does not hurt this steam elephant—the hotter the weather the more it seems to enjoy the work.

Cozy in Hot Weather

The little Ford Sedan is just as much a hot weather car as a wet weather car. The same arrangements that keep out the rain keep out the heat and dust. You are always cozy in a Ford Sedan, whether the weather is wet or dry, hot or cold.

There is no mystery about good oil

It must be made from crudes carefully selected for their "oiliness" and stability. These crudes must be refined to preserve their original characteristics and to make them pure.

In selecting crudes for Zerolene the Standard Oil Company has the advantage of its own large production of practically every type of crude. The company is not compelled to use any particular crude because it happens to be the only one available.

Crudes selected for Zerolene are brought to our refineries in special pipe lines. They are refined by our own patented, high-vacuum process which preserves their "oiliness" and stability.

No other refiner on the Pacific Coast uses any form of vacuum distillation. No other refiner in the United States uses as high a vacuum as this company.

Purity Essential

Zerolene oils are pure. This company has always considered the removal of all detrimental properties and compounds as essential in making Zerolene.

Because of their "oiliness," stability and purity, Zerolene oils give perfect lubrication, and permit the development of the maximum power, speed and gasoline mileage of the car.
