**NATIONAL FORESTS RETURN LARGE INCOME TO PUBLIC**

A total income of \$866,532.54 was received from the national forests of Oregon and Washington for the year closing June 30, according to District Forester Geo. H. Cecil, of the north Pacific district.

Revenue amounting to \$5,068.42 was paid into the United States treasury from all of the national forests. Receipts for the last quarter were far in excess of those for any preceding quarter in the administration of the national forests except one in 1920. the livestock industry of the west, which has been passing through one of the most severe financial depressions of its history. Twenty-five per cent of all national forest receipts are given to counties in which they lie, to be expended by state and county authorities for schools and roads.
