You won't "keep adding"

You know lots of men who buy a quart of oil with every five or ten gallons of gas. Trying to liven dead oil with new oil. It won't work.

The best method of lubrication is to drain your crankcase about every 800 miles and refill with

better lubrication at half the price

If you could get better lubrication with high-priced oils in return for the fancy price you pay, well enough—but the superiority of Zerolene in each of the following tests has been demonstrated repeatedly:

- Zerolene follows closely the changing clearances of the moving engine parts; it maintains perfect piston seal always.
- Zerolene absorbs less gasoline than other oils; it resists dilution and emulsification in the crankcase.
- Zerolene forms less carbon; it cuts carbon removal operations from 25% to 50%.

The reason is this: Zerolene is produced from selected Western Naphthenic-Base Crude, and vacuum-distilled by the exclusive high-vacuum process developed by this Company.

Insist on Zerolene—even if it does cost less.
