Old saying revised: "The trusts owe us a living."

The great majority of people do not attend church simply because they do not want to—what's the use beating around the bush about the matter.

The fairest women often treat you the worst.

A CLASSIFIED AD MIGHT HELP While things are quiet with the secret service a few of its members might be put on the scent of some congressional campaign pledges that seem to have become lost, strayed or stolen.

There are about 70,000 more people in the employ of the government than there were ten years ago. That's where some of the increased number of optimists come from.

A Mormon preacher claims that the Garden of Eden was located in Missouri. Anyway old Adam was shown a few things.

BEATS THE MACHINE KIND A man with an inclination to snooze in the mornings has invented a sure-go automatic fire starter, so that he doesn't have to get up until things are cozy and breakfast is simmering. The most approved method is to marry one.

What the World Is Doing

(Popular Mechanics Magazine.)

An Improvised Smokehouse

When it is necessary to smoke small quantities of meat, and no smokehouse is available, one can readily be improvised from a laundry stove, a barrel, and a support such as a sawhorse or wooden box.

One end of the barrel is removed, and a hole, 8 in. in diameter, is cut in the other end near the side, as shown. This hole is fitted over the short length of pipe projecting above the stove, the barrel being supported by the sawhorse and by a brick placed on the stove. The meat is hung by means of small wire hooks, from an iron rod placed across the top of the barrel.

The whole arrangement is placed outside doors in a place sheltered from the wind. Wood or corncobs may be used for fuel.

A Washer You Can Make

A simple but efficient clothes washer of the type shown in the drawing has been used successfully for a number of years for cleaning clothes that will stand boiling.

It consists of a wash boiler, fitted with a 1-in. pine board that is perforated with 3/4-in. holes and mounted on wooden legs. A larger hole at each end permits the insertion of two lengths of 1-in. pipe, 14 in. long, which are fitted at the upper end with an elbow, nipple, and cap, the cap being perforated with numerous small holes. The pipe should fit snugly in the holes in the board, and the lower ends, which are open, must be only a slight distance above the bottom of the boiler.

In use, the arrangement is fitted in the boiler as indicated, the clothes are

packed in, and water is poured in to a depth not quite sufficient to cover the clothes. As soon as the water boils, the steam confined beneath the clothes forces the water up through the pipes and over the clothes. The water will then seep through the clothes, and in this way there is a continuous circulation, which cleans the clothes in a short time.

Novel Sentinel Thwarts Mail-box Thieves

The activities of mail-box thieves, who can easily take letters from the ordinary box, are rendered fruitless by the attachment of a simple hook appliance shown in the illustration. It consists of two overlapping series of wires, having their upper ends coiled to impart a spring action to each series. When placed against the letter opening in the interior of the box, the

upper series, like a one-way gate, permits the letter to be inserted and to fall into the box. The lower series of wires, however, has hooked ends, and guards against any attempt to withdraw the letter through the slot.

Unique Fish-Propagation Boat

An unusual method of carrying live fish long distances for propagation purposes without bruising or injuring them has been adopted by the Ohio Fish and Game Commission. Instead of tanks or barrels, a boat is used for this purpose, which has two built-in tanks running lengthwise of the vessel, for the most part below the water line. Each of the tanks is provided with an intake at the bow, below the water level, and with an outlet at the stern, above it. This arrangement assures the fish a continuously fresh supply of water.

Fossils Prove Asia Once Part of America

Fossils unearthed by the Third Asiatic Expedition, working in Mongolia, prove that a broad land connection once existed between North America and Asia. Part of the remains has been identified as that of the "titan-

mamals that ever lived. This animal is estimated to have measured at least 12 feet high and about 24 feet long. The illustration shows the comparative sizes of a man, an African rhinoceros and the giant baluchitherium.

Drills Horizontal Holes Straight Anyone who has ever used a brace and bit knows that in the drilling of horizontal holes there is a great tendency to raise or lower the brace a trifle while drilling, which, of course, results in the hole being drilled at an angle. To overcome this tendency slip a large washer that is free from burrs over the bit so that it rests on the smooth shank. As soon as the bit is held at an angle the washer will travel one way or the other, and the workman can correct the fault instantly.

Keyless Auto Lock Acts When Car is Stopped

Besides automatically blocking the ignition when the car is stopped, a keyless automobile lock positively holds the steering gear. There are no keys to forget as the device is fitted to the steering post and operates with 10 buttons. It may be set with any number up to 10, and the combination may be changed as often as desired. When a button is touched to shut off the ignition, the car is automatically locked and cannot be operated again until the combination is worked.

Steel die work. The Sentinel.

NOTICE OF FINAL ACCOUNT.

Notice is hereby given that the undersigned, as administratrix of the estate of Irving W. Petrie, deceased, has filed her final account in the office of the County Clerk of Lane County, Oregon, and that Saturday, the 30th day of October, 1923, at the hour of 11 a. m. in the forenoon of said day, in the County Court Room of said County has been appointed by said Court as the time and place for the hearing of objections thereto and the settlement thereof.

Dated and first published Sept. 14, 1923.

Last publication Oct. 12th, 1923.

MABEL CONNER, Administratrix of the estate of Irving W. Petrie, deceased.

J. E. YOUNG, Attorney for estate. spt14oct12e

THE FLAVOR LASTS

Waverly
THERE are three kinds of crude petroleum from which the motor oils on the present market are produced—Pennsylvania (100% Paraffine), Semi-Asphalt and Asphalt Base (Mid-Continent) Crudes.

The first contains no asphalt, the last contains no paraffine and the Mid-Continent Crudes may contain some paraffine. Yet the second class prefers to be known as a paraffine base oil!
WAVERLY is 100% Pennsylvania, 100% Paraffine.
