

Can YOU Save Money?

Andrew Carnegie once said: "The man who does not and cannot save money, cannot and will not do anything else worth while." Andrew Carnegie amassed a fortune but the FIRST thing he had to do was to save his money. You may not be able to accumulate a fortune but can, with the help of a Savings Account, take advantage of opportunities that you otherwise would be compelled to pass by.

EYES ARE AN OPEN BOOK TO US

HAVE US EXAMINE YOUR EYES

Only diseased or injured eyes require the services of an oculist (physician eye-specialist).

Errors of vision require glasses—properly fitted by an optometrist (the legal practitioner of optometry).

If you have an error of vision, muscular trouble or eyes strained from overwork—then you need exactly the services we render.

If your eyes need anything further, we will so advise you.

D. J. Scholl

MR. AND MRS. BERT HANDS.

UNKNOWN QUANTITIES
A superintendent of schools of a large city says there is no use in teaching children the elements of algebra unless they intend to go on with the study. She may be right, but those who go out to buffet with the world will find many xyz problems after they have learned the abcs of business.

The competitor who lowers himself to the use of vulgar abuse is about to become a competitor no longer.

When it's a question of choosing between eating onions or kissing your sweetheart, the onion hasn't half a chance.

When a woman loves one man from the bottom of her heart, there may yet be plenty of room at the top.

A six-year-old boy will ask more foolish questions than a lawyer testing a juror.

Things that are not worth doing at all are often done the best.

The extreme styles give a man a chance to know woman better, but to understand her less.

Men should not forget that their character is often judged by the way their wives look as if they were treated.

Motion pictures can now be shown without turning down the lights. They never will become popular with the younger set.

Oyster Shells Bring Rich Crops for Farmers

Burning and grinding oyster shells into a powder to make plants grow, is a growing industry of the South. A recent scarcity of nitrates forced farmers to look for some other fertilizer, and they adopted the oyster. To use something that lives at the bottom of the sea, the food of a starfish, for improving and seemed impossible at first, but in the powdered shells were found qualities that enriched the soil and so they are now being widely used. The shells are burned on a grate over a roaring fire. They are hauled by wheelbarrow to a conveyor which carries them to the place called a pulverizer, where they are mashed and ground into fine dust, ready for the farmer. This recently developed industry has brought oyster hunting to a state where it is said to be more profitable than any other kind of fishing.

Change Golf-Club Weight to Suit the Player

To enable the weight of a golf club to be instantly adjusted to suit the player, one manufacturer has inserted removable pieces of lead in the head of the stick. As changes may be made during the game, this does away with the need of carrying several drivers or brassies in the bag so as to have a variety to select from in meeting various situations. Slight changes in the weights of the clubs also have proved useful when the player feels out of form.

.....

Estimates place the amount of oxygen in the earth's atmosphere as 1,000 times greater than that present in the air surrounding the planet Venus.
