

### Some Livestock on Every Farm

Specialized grain and hay farming without livestock to consume the surplus is like raising livestock without growing any of the feeds which will reduce the cost of producing the animals. Either way puts the scale of profits out of balance and leaves the farmer to face the possibilities of loss on maybe his one and only class of production.

Similarly, milk products are more profitable than producing cattle for slaughter, for it is said the output of dairy products in one year is greater in dollars and cents than the total slaughtered worth of all the cattle in the country.

We are particularly interested here at the Bank of Cottage Grove in the development of permanent and continuous agricultural prosperity, and are always glad to lend assistance in providing the right kind and quality of livestock for the farmers in this locality.

The Pacific International Livestock Exposition at Portland, November 3 to 10, offers an unparalleled opportunity to study the ways and results of profitable stockraising. It is the greatest gathering together of purebred dairy and beef cattle, sheep, hogs, goats, horses and also chickens and rabbits in the entire country. Why not attend this year?

### Bank of Cottage Grove

### "Style" in Glasses

Yes, the selection of glasses has an important bearing on the APPEARANCE of the wearer.

No two faces are exactly alike, hence the selection of glasses on the fitting of frames should at least be done under the guidance of one thoroughly competent and experienced.

This establishment prides itself on its ability to suggest glasses that will truly become the wearer. We have reason to believe that this feature of our service is appreciated by our patrons.
