

Oil Wells Progressing

Our local drillers on Mount David continue to make most gratifying headway and are passing through oil indicating structures even at a much shallower depth than similar formations were encountered at Eugene; at the latter well a 3-foot layer of rich oil-bearing sand was passed through last week, all of which only further demonstrate the accuracy of those who are staking their reputation as scientific oil locators, depth only being needed to fulfill all prophecies made.

Last week's wonderful development at Half Moon Bay leaves no further proof needed as to who is right in the claim where oil veins are located, almost without exception high authorities in oil geology disputed the Sage-Olson Co.'s claims that abundance of oil existed in that region, it now transpires that the Sage-Olsons were right and their opponents wrong; so too which only prove to be right as regards Oregon, just as they have been without exception in other localities where there predictions were questioned.

A word to the wise is sufficient, get in with them while you can, or some day you will be too late. The New York stock exchange reports a rise in oil stock each week. An investment placed with the Sage-Olson Co. will be sure to increase your estate a little later on. For particulars see **TOM AWBREY AT DURHAM'S.**

Paint, Etc.

The cash price is always the cheaper. The cash store has no losses on bad and slow accounts. It does not have to charge for interest on money tied up in goods delivered but not paid for.

You'll find our goods of the same quality as before, but you'll be interested in comparing prices with what they were under the credit plan.
