What Are the Facts?

There is a wise old saying that "the proof of the pudding is the eating thereof."

We all appreciate that. Regardless of what we say of ourselves and of our goods and what others may say about us and the kind of goods we carry, it is a fact that you can better judge for yourself.

In this way you can obtain unimpeachable evidence of what are the facts.

Our policy, our methods, our values—even our prices—are always open and alike to all. We invite critical inspection.

FARM POINTERS

(From O. A. C. Experiment Station)

It is a good idea to put clean sand on the floor of the brooder house underneath the litter. It should be placed in the house several days before the chicks are put in so that it will be thoroughly dried out.

A deformed foot or crooked leg of a horse is often the result of neglect in trimming the colt's feet.

Be sure to feed good buttermilk or sour skim milk. Many chicks are ruined each year by feeding milk in which there is washing soda or some other form of neutralizer.
