

If there is anything a woman enjoys more than having her grocery bill smaller than her neighbors', it is to have it enough bigger so that the neighbors will talk about what an extravagant cook she is.

We condemn others for their mistakes quite as readily as we find excuses for our own.

There is no fool like the fool who tries to fool himself.

Silver-tongued orators are probably so called because their fortune is their tongue.

When a man is down on his knees in a fruitless search for a misguided collar button he seldom associates the position with prayer.

A German savant wants to know how long a dream lasts. That often depends upon how long you put off the marriage ceremony, or how long before election day.

That old saying about casting pearls before swine" is losing its aptness.

The golden rule is one of the kind that works both ways.

United States Senator

CHAS. L. MCNARY

Republican for Renomination

WHAT HE HAS DONE

During his seven years in the Senate he has secured—\$31,020,269 for Oregon Development

\$ 9,255,762 for Rivers and Harbors
\$ 9,080,000 for Reclamation and Power
\$11,138,107 for Public Roads
\$ 507,900 for Agriculture
\$ 310,500 for Forest Protection

This is more than has been secured by any other Western Senator in the same period.

His powerful committee assignments and his prestige in the Senate equips him to accomplish even greater things for the continued development of Oregon's Resources and Industries.

It would take years for a new man to attain his present position of prominence and influence

OREGON NEEDS HIM

His Slogan: "For Oregon; Its People and Their Welfare."

There's a Reason Why You Should Prefer a CHEVROLET

It's the world's lowest priced quality car. The CHEVROLET has always been noted for its powerful motor.

All closed bodies are of the best modern type of construction such as is found on the highest-grade cars made.

All windows are plate glass and have Ternstedt regulators, affording quick, reliable adjustment to suit the weather and the temperature.

Every CHEVROLET has sufficient room for the comfort of the number of passengers for which it is rated.

Its low cost makes it possible for families of moderate income to own both an open and a closed CHEVROLET for less than the price of some open cars.

Come in and ask for a demonstration. We are always glad to have you compare this car with any other small car on the market.

Beaulieu & Harrel

For Sheriff Frank E. Taylor

Vote 80 X

I believe in the strict enforcement of all laws, and especially the prohibition law. I pledge my best endeavor for the execution of the above.

I am a Spanish War veteran, a member of the Masonic, Knights of Pythias and Modern Woodmen lodges, also the Grange and Farmers' Union.

I have resided in Lane county for 36 years, and was in the employ of the postoffice in Eugene for 10 years. At present am a dirt farmer.

I will appreciate your vote.

Increase Germination of Seed by Cleaning

More Thorough Scarifying Decreases Hard Kernels.

Cleaning and scarifying of alfalfa seed prior to planting increased the germination 23 per cent and greatly increased the purity of the seed, according to results secured by O. A. Stevens, seed analyst at the North Dakota Agricultural college, in tests conducted during the past year with 90 samples of alfalfa.

Germination of the samples prior to scarifying and cleaning averaged 57 per cent, with 38 hard seeds. After cleaning and scarifying, the germination averaged 78 per cent and the number of hard seeds was cut down to 20. More thorough scarification would further decrease the number of hard seeds. The amount of pure seed in the samples prior to cleaning averaged 92 per cent, and after cleaning 97 per cent.

"Hard seeds, that is, seeds which neither germinate nor rot, constitute a problem peculiar to the legumes, alfalfa, sweet clover, white, red and alsike clovers," Mr. Stevens declares. "Water fails to penetrate the seed coats, and the seeds may lie dormant in the ground for long periods of time, often several years. Frequently, samples of alfalfa and sweet clover contain up to 75 per cent of this hard seed. To make these seeds germinate, they are usually scarified, that is, the coats are scratched by some mechanical means so that the moisture can get through them. Occasionally samples of alfalfa and sweet clover may show high germination without scarification, but seedsmen and farmers now make it a rule to scarify their seed before planting, especially if using varieties of high value."

Feeder Prevents Swine From Upsetting Swill

Handy Hog Feeder.

Carrying swill to a bunch of hungry hogs is no small accomplishment, if they are to be kept from upsetting the pail in which it is carried. So an ingenious farmer built a feeder like the one in this illustration. There is no need for a single drop to be spilled.

While it may be built of any material, this one was made of concrete and is serviceable and lasting.

Steady Growth Is Seen in Pure Bred Holsteins

An average of 9,500 registrations and 7,920 transfers a month during the years 1921, 1922 and 1923 indicates that the pure bred Holstein cattle business is growing steadily despite adverse live stock conditions which have prevailed during this period.

Membership in the Holstein-Friesian Association of America increased at the rate of from 138 each month in 1921 to 149 in 1923.

Since 1884, when this organization of Holstein breeders was established under its present name, to January 1, 1924, 1,299,129 certificates of registry and 1,201,958 certificates of transfer have been issued. Registrations numbered 877,520 for females and 421,000 for males. Of the transfers issued 860,240 were for females and 481,718 for males. A total of over 23,000 Holstein breeders are now members of this association.

Potato Scab Corrected by Corrosive Sublimate

Potato scab is a disease acquired from infected soil, or infected seed. If it is in the seed, it can be remedied by dipping the seeds in corrosive sublimate, one ounce to eight gallons of water, for a period of ten minutes. If the disease is in the soil, the remedy is more difficult. Apply sulphur in the rows before planting the seed—600 pounds of sulphur to the acre. The safest way, however, is to plant next year's crop on clean land.

Corn Profits Increased by Heavier Fertilizing

Dean R. L. Warts, Pennsylvania State college, is authority for the statement that in fertilizer demonstrations conducted in Allegheny county, Pennsylvania, last summer, 350 pounds of a 4-8-4 mixture plus 300 pounds of acid phosphate per acre produced more than twice as many ears of sweet corn than when no fertilizer was used. The demonstrations revealed distinct advantages for heavy applications of high-grade mixtures.

The mother who does not teach her daughter to do housework is not doing justice by her daughter nor her future son-in-law.

It is less dangerous to let a drunken cannibal throw bowie knives at you than to be around a woman when she is sharpening a pencil.

Four billion dollars' worth of eggs are laid annually by the hens of the nation. If by their fruit ye shall know them, the hen should be the national bird. Wouldn't biddy look fine on the back of our coins holding a key in an upraised foot and hanging onto the national debt with the other.

A conceited man seldom thinks so.

If there is anything more laughable than to see a young man try to act old, it is to see an old man try to look young.

A blemish in a piece of highly polished wood or metal is made all the more noticeable because of the beauty and attractiveness of the surrounding body. So also is it in human life. Brilliance of mind and purity of character tend to make a fault appear all the more hideous.

Some of the sweet girl graduates who stood high in mathematics are not yet able to perform the proper equation on the batter to have good bread as the result.

You often lose more by the friends you allow yourself to associate with than by the enemies who put you on your mettle.

The Minneapolis husband who, after knocking his wife down with a board, still claims that he dearly loves her, certainly succeeded in successfully dissembling the fact.

As a muddy stream can travel but a little way into a body of pure water before it spreads out and discolors the entire body, just so does a moral leper contaminate those with whom he comes in contact.

There is a fellow in California who laughs every time an earthquake comes along. He must be one of those fellows who have to have a brick wall fall on 'em before they see the joke.
