

Just Like the Thermometer

The higher the mercury climbs, the more luxuriant and fruitful nature's growth becomes. It's the same with periodical savings—the higher the amount climbs the more useful and productive the savings account becomes. A savings account is a thermometer that registers the degree of financial independence enjoyed by the depositor. This bank offers absolute safety, and an opportunity for maximum growth through the generous interest it pays on savings accounts.

If we haven't exactly what you want—or can't produce it—if it is anything in the printing line—we can get it for you. xxx

The Best Steaks for Boiling

Of all the ways in which a steak may be served, broiling is the most appetizing.

But to be as good as it can be, the steak itself must be cut from the proper part of the beef. This is one point that you may always be sure about when you buy your steaks here.
