General Dawes Loved By Children Boys and Girls Find Kindly Heart In Noted Economist and Executive

General Charles G. Dawes, Republican candidate for the Vice-presidency, is a very different character to the children of Evans-ton, Ill., where he lives, than he seemed before the now famous congressional investigating committee.

"Charlie exploded that time in Washington," said a neighbor of General Dawes, "because it made him mad clear through to see any group of men trying to hunt for petty scandals in the records of Americans who had devoted themselves unstintingly to the conduct of the war. He thought the national thumb was being hit with a hammer and he reacted like father does when he misses the carpet-tack."

General Dawes has lived in the normal American atmosphere of religious belief and reverence for God since the days when as a boy

he attended the little wooden Presbyterian church at Marietta, Ohio. Down there, where he is still Charlie to a large part of the population, he is loved with a unanimity and intensity that makes any criticism of him an invitation to fight.

The little girl in the picture above is Virginia, one of the two children adopted by General and Mrs. Dawes. The upstanding boy with his hand on the General's shoulder is Dana, the other. The neighbors' children make the Dawes' yard their playground at will and the General himself is a prime favorite with them.

General Dawes' own boy was drowned in 1912 and two hotels, one in Chicago and one in Boston, bearing the son's name, Rufus F. Dawes, cater to the homeless and jobless and are trustworthy evidences of the Dawes character.

Watch This Car

A superior stock Chevrolet left Eugene at 8 a. m. Tuesday, October 7, on an endurance and economy run and it will not stop again until Saturday, October 11, at 1:06 p. m., almost five days and nights of continuous running.

We want the public to know the outcome of this test for we are sure it will be a credit to the Chevrolet.

This is just a plain stock touring car and what it will do in this run any Chevrolet will do any time for any one.

The results of the run will be posted Saturday, October 11, after 2 o'clock on the bulletin board at Beaulieu & Harrel garage.

Umphrey & Mackin
THE QUALITY STORE—GOOD SERVICE

We want you to see our beautiful new braid trimmings and dress ornaments—our saleswomen will be glad to help you with suggestions for your dress whether you buy or not.

Wise Johnny.
School ma'am—"Why was Solomon the wisest man?"
Pupil—"Because he had so many wives to advise him."
School ma'am—"Well, I declare! That is not exactly the reason given in the book but I award you, Johnny, our weekly prize for brilliant scholarship, and here is a nice large doughnut that will go well

with your luncheon."—Everybody's Magazine.

Blessing on Thee.
Blessing on thee, little dame,
Bareback girl with knees the same,
With thy rolled down silken hose,
And thy short transparent clothes;
With thy red lips, reddened more
Smugged with lipstick from the store,
With the make-up on thy face

And thy bobbed hair's jaunty grace,
From my heart I give the joy
Glad that I was born a boy.
—Exchange.

Almost everybody uses electricity today. So universal has its use become that busy generators are turning out approximately 470 kilowatt hours a year for every man, woman and child in the United States.

What the World Is Doing

As Seen by Popular Mechanics Magazine

Heart Tester Helps in Liquor Hunt among Luggage

With the aid of a stethoscope, used by physicians to detect disorders of the human heart, the chief of police

of a Minnesota city tests incoming and outgoing luggage for traces of gurgles that might reveal the presence of contraband liquors. With the receiving tubes adjusted to his ears and the sensitive diaphragm of the instrument placed on the suspicious suitcase or bag, the official, by shaking the article, can detect quickly any sounds that might warrant a further investigation.

Over Hundred Million Living in Electric-Lighted Homes

Electric lights are now used in the homes of approximately 111,000,000 persons, nearly six and one-half per cent of the world's population, according to a recent survey. In the United States, 20,000,000 persons enjoy the benefits of electric service in their homes, this country leading all others in the amount of electric power used each year. Japan is second, with 23,000,000 living in electrically lighted homes and Germany is third with 8,810,000. Seventy-five per cent of all people in New York have electric lights.

Speed of Great City Told by Startling Figures

Statistics for the city of New York show that an immigrant arrives at that port every thirty seconds and an average of one arrest is made each two minutes. A child is born every five minutes and a funeral occurs every seven. Every twelve minutes a marriage is performed and a divorce is granted for each six hours of the day. New businesses are started at the rate of one every forty minutes and a failure takes place every five hours.

A ship leaves the harbor every forty-five minutes and someone is killed by accident every fifty-five minutes. The crime records of the metropolis are startling in that they show that every seven hours there is an attempt to take some person's life, a suicide is committed each ten hours, and a murder occurs every twelve hours.

What Horse Can Pull Shown by Tests in England

Tests made recently in England proved that a pair of horses, each weighing 1,600 pounds, could haul a load 850 pounds greater than themselves. On a metal track, one of these animals, it has been shown, can draw one and two-thirds times as much as on a good asphalt surface, five times as much as on cobblestone paving and twenty times the load it can pull on an ordinary mud road. For the usual type of farm horse, a cart carrying a weight of 1,500 pounds is considered to be a fair task. While pulling light vehicles and under saddle, records indicate that horses are equal to great feats of strength and endurance. A twenty-year-old horse hauled to a light cart is known to have traveled a hundred miles in less than thirteen and a half hours and was in excellent condition at the end of its journey.

Well-seasoned wood serves excellently for radio parts in the absence of more suitable material, if thoroughly dried.

Saving Gas at Home

All fuel experts know that a fire several feet below the boiler shell will give much better results than a fire close under the shell. This fact induced a home owner to try out the idea of the heat intensifier on a gas stove, as shown in the illustration. It consists of a strip of ordinary black stovepipe iron, about 3 in. wide and a couple of inches longer than three times the diameter of the hole in the grate, which will be about 20 in. in most cases. The ends are fastened together with rivets or small stove bolts and several notches are cut in one edge. This ring is placed over the gas-burner holes, with the notched side up, and the cooking vessel is placed on top of the ring. A lighted match held near any one of the notches will light the gas when the

tap is opened. The use of such a ring concentrates the heat under the vessel and consequently reduces the consumption of gas.

A can of lye dissolved in a bucket of boiling water will clear drain pipes of grease and other organic matter.
