Seventh Annual November SUBSCRIPTION SPECIAL Save 75c

Following the plan adopted six years ago, The Sentinel announces its Annual November Subscription Special.

The change to a twice-a-week publication, which will be put into effect as soon as our new typesetting machine is installed, which will be not later than November 15, the subscription rate will be advanced to \$3 the year, but during November the rate for the

TWICE-A-WEEK SENTINEL

will be **\$2.25**

It is the intention of The Sentinel to give every subscriber exactly the same treatment. Especially does The Sentinel look after the interests of its old friends who have remained on its subscription list year after year. In conformity with this policy, this special rate is made to apply to those who are in arrears and to those who are paid in advance, as well as those whose subscriptions expire during November.

Those who are in arrears will be required to pay their subscriptions to November of this year and may then add \$2.25 to pay to next November.

Those whose subscriptions expire in November, pay \$2.25 to carry subscription to next November.

Those whose subscriptions are paid in advance will merely deduct from \$2.25 the amount they are paid in advance and will then be paid to November of next year.

The idea is to have all subscriptions expire in November, thus saving The Sentinel considerable expense in bookkeeping, which saving we give to our subscribers.

REMEMBER THAT TO TAKE ADVANTAGE OF THIS OFFER YOU MUST DO SO BEFORE NOVEMBER 30.

Towing Small Boats

When the stream is flowing so fast or the wind blowing so hard that it is difficult to make headway by rowing, the simple stunt shown in the drawing offers an easy way of towing the boat along the bank or shore. Tie the boat line to both bow and stern, as shown. By paying out on the bow part of the line and holding in the stern line, the boat can be kept nearly parallel with the bank, while if only a bow line is used the current or wind will cause the bow to dig into the bank, making towing difficult. If a narrow creek is encountered, its mouth can be crossed in the boat as follows: Let out the bow and haul in the stern; this will cause the boat to lie close against the mouth. Fasten the towline to an ear pushed slantingly (toward the water) into the

bank. After walking across the creek in the boat, the ear is pulled out, which can readily be done on account of the slant at which it is placed.
