**Simple Window Aerial**

Various kinds of indoor aerials are advocated for buildings where any other type is impossible; one of the most effective is shown in the illustration. Two spreaders of heavy iron

wire or light iron rod, a little shorter than the width of the window, are bent with an eye at each end, and one in the center. The two spreaders are connected with a number of the light curtain springs that are widely used in stead of curtain rods. The efficiency of the aerial depends to a great extent upon the number of springs used. The spreaders are suspended between the top and bottom of the window casing insulators being used as shown. The springs are drawn up tight so that they will not touch each other, and the aerial will not swing.

**Pulling Car Out of Mud**

When stuck in mud the lone autoist need not despair as long as he has a pair of good chains with him, for, with their help, the car can usually be run out of the mud, providing, of course, it is not too deep. One end of a chain is fastened around the tire and to the spokes of a rear wheel, while a short, stout iron bar is pushed through the links at the other end of the chain and a tow rope tied to this bar. If no iron bar is handy or it is too large to be pushed through the links, the tow rope is tied to the last cross chain. The other end of the tow rope is securely tied to a tree located in front of the car, slightly toward the side. By applying power to the wheel, it will run along the chain for a foot or more. The operation is repeated until the wheel is out of the mud.

**Cleaning White Woolens and Furs**

Garments are often dry cleaned at home, but the result obtained in the case of white woolens or furs is not always satisfactory. However, the simple trick described below can be employed by anyone, and the results will prove a pleasant surprise.

After the woolen or fur has been washed and rinsed in gasoline, it should be wrung or shaken out thoroughly and placed in a deep pan. A pound or two of white flour should then be sifted over and rubbed into the article. After allowing the article to dry on the line, the flour is whipped out, leaving the garment in a cleaner and whiter condition than usual after cleaning. This is due to the fact that the flour sifts into the fur or fabric and absorbs the dirt with the gasoline that cannot be wrung or shaken out. When whipped out, the dry flour naturally carries the dirt with it.

## CHRISTMAS SEAL RESULTS ARE HUGE

George Fast Yielding to Health Through Work Financed by Christmas Seals.

The Christmas Seal is with us again. Seven million of them have been distributed throughout the state of Oregon to be sold during the month of December to finance the "Fight Tuberculosis—Give Health" campaign. The seal, with its bold victorious figure, typifies the movement which it has financed so successfully that within the last fourteen years the death rate from tuberculosis has been cut in half in the United States. Throughout the country, one hundred thousand people are enjoying the Christmas season, who would have perished if the disease were as uncontrolled as it was a decade and a half ago.

In Oregon, the toll in tuberculosis deaths in 1923 was 623, and the best estimates indicate that about 5000 people in the state are afflicted. Tuberculosis is now characterized by leading specialists as a preventable, curable disease, and one that need not menace the lives of our citizens, if known measures of prevention and proper living are put into practice. The chief object of the Christmas Seal Sale is to finance the educational campaign which will help equip the general public with such information about the maintenance of their health, that tuberculosis shall be ultimately eliminated as a destroyer of mankind.

## TUBERCULOSIS YIELDS TO HEALTH PROGRAM

Five Cents Per Capita for Christmas Seals Pays for Oregon Campaign.

The only source of funds for the anti-tuberculosis, and Public Health work conducted by the Oregon Tuberculosis Association and its seventeen affiliated County Public Health Associations, is the Christmas Seal Sale. Every person who purchased seals last year is entitled to the satisfaction of knowing that even at the small per capita expenditure of 5 cents, over a period of a year, a long list of things was accomplished. Thousands of children were enrolled in the Modern Health Crusade, and given the benefit of definite teaching and practice in the performance of habits of personal hygiene so necessary to good health. Public Health Nursing service was extended into a larger number of Oregon counties during the year than ever before. Free tuberculosis clinics were held. Thousands of pieces of literature was distributed. Supplementary material to aid in the required teaching of Health and Hygiene was offered to every teacher in the state.

Another piece of the Association's work, of the utmost value, is the making of surveys, and investigations regarding the tuberculosis situation in the state. The Bureau of Clinics and Surveys has been able to furnish accurate and up-to-date statistics that are fast crystallizing public opinion in regard to the desperate need of additional tuberculosis hospital facilities. All this was done on 5 cents per capita. If every purchaser would double his purchase the Association could double its service.

**Oregon Seal Record Excellent.** A record in the December Christmas Seal Sale was made by Oregon last year, which places her well toward the top of the list of states in the per capita sale of seals. Her 1923 record was 5.6 seals sold for every person in the state, an increase of seven-tenths of a seal over the 1922 mark.

Portland, and Multnomah county, Oregon, last year won a cross-country contest against Portland, in Cumberland county, Maine. The race was to see who would sell the highest number of seals per-capita. A large silver loving cup was awarded Multnomah county, which reached the record of 9.2 against her opponent's 6.2. Even so, Multnomah did not reach the top among the Oregon counties, for she was slightly surpassed by Deschutes.

The 1924 Christmas Seal Sale begins December 1, and continues until Christmas. The sale constitutes the sole support of the Oregon Tuberculosis Association, with all its health and anti-tuberculosis work, and provides funds for the County Public Health Associations. Ninety-five per cent of the proceeds are retained within the state, only five per cent being sent as commission to the National, or parent organization.

For seventeen years, Christmas Seals have been following their useful career in the United States. The first sale amounted to about \$3000. Last year's totaled four and a quarter million dollars.

**Thief Breaks Into Harper's.** A thief broke into Harper's restaurant last evening and took \$5.20 in cash and a lunch which had been prepared for one of the restaurant's boarders. The intruder gained entrance by chopping out the lower panel of the back door and cutting a hole through the screen door with an ax. It is thought that it was local talent and it is quite certain that the thief was small, as the entrance made was very small.

**Bazaar Is Planned.** A bazaar and dance will be held Saturday at the army sponsored by the Rebekah Staff club for the benefit of the L. O. O. F. building fund. The bazaar will be open all day and at 3 o'clock a musical program will be given by local talent. In the evening dancing will be an added attraction, the music to be furnished by the Midnight Serenaders, a local orchestra.

**W. O. W. Lodge Elects.** The W. O. W. lodge has elected the following officers: T. L. Smith, consul commander; Frank Porter, advisor; R. B. Hanna, banker; F. C. Coffman, clerk; E. C. Leum, escort; W. R. Lancaster, watchman; Glen Walker, sentry; Mike Kobelbeck, manager.

**Eads Property Sold.** The E. E. Eads business property on west Main street has been sold to Noble William White, of Seattle, son of W. J. White, of this city. It is thought that Mr. White will build on the property and make his residence here.
