

# BEWARE OF UNCLEAN MILK

Milk is a ready carrier of anything with which it comes in contact. The only safe milk to use is that which is kept clean from the time it leaves the udder until it is used.

Powell's dairy is open to inspection at any and all times. Visit it in your Sunday best, if you wish. You will carry away no odor of any kind. Sanitation is our watchword. Our milk reaches the pasteurizing and bottling station under most sanitary conditions and then it touches nothing but machinery that has been sterilized. It goes into bottles that have been sterilized and is not touched at any time by human hands.

Pasteurizing does away with the possibility of germs of any kind and there is no chance anywhere in its handling for foreign substances of any kind to get into it.
