

LOOKING FORWARD

Success in business comes largely through the development of the important ability to look forward—to sense the future conditions of business and finance—coupled with a certain degree of conservative optimism.

Here at this Institution you will find an association with men of broad vision, trained by study and experience in the wisdom of looking forward.

Your interests are our interests—let us serve you, too.

Our Business Is Banking

Banking Is Our Business

The sign "Bank" does not make a bank and is often misleading. It requires time, energy, close attention to business, a substantial capital and ripe experience in banking to make a bank. We claim, without blushing, all the essentials necessary to make our business that of banking, and tender our patrons a service thoroughly seasoned by years of experience, backed by a substantial capital and a large surplus.
