

# Reflecting the Progress of This Community

In the building of the Bank of Cottage Grove at Main and Sixth streets, and adjoining quarters, is being constructed a new, thoroughly modern banking home.

When the remodeling is complete, residents of Cottage Grove and vicinity will have access to financial facilities surpassed by none. There will be provision not only for convenience and comfort but for the rapid, proficient transaction of all financial business. And the building itself will reflect credit upon this community and indicate something of the progressiveness which characterizes its citizens.

## Our Growing Business Demands Still Larger Quarters

The remodeling which is anticipated will be completed about May 1, is the result of a growing volume of business which finally has reached a point justifying the Bank of Cottage Grove in placing at the disposal of its patrons and the general public, equipment complete and modern in every particular.

Bus and Truck Competition Results in Reduced Business by Southern Pacific.

Motor bus and motor transportation versus rail transportation was ably discussed this noon before the Lions club by Robert H. Holmes, of Eugene, traveling agent of the Southern Pacific. He said in part:

"A question of very great importance before the eyes of the people throughout the country is that of motor bus and motor truck competition and what effect it is having upon the communities it serves. Our rapid growth and development brought on the program of good roads which in turn made it possible for this new form of transportation to exist. The great question as I see it is whether or not the people are of the opinion that these good highways were constructed for commercial transportation purposes.

"There is a place for such transportation and that is in the territory which has not been developed by any rail transportation system. In this field the bus and truck operators could serve as feeders to the transportation companies and thus work hand in hand with them. "It has been the policy of the Southern Pacific to throw out feeders from their main line to serve and develop communities. While here I would like to bring out a few facts about the Southern Pacific. Their operations extend from the Atlantic to the Pacific and from Portland, Ore., to Orendain, Mexico, about 300 miles northwest of Mexico City. It is one of the world's largest transportation systems, operating 13,451 miles of rail lines and about 3,825 miles of water lines. The Southern Pacific company has more than 60,000 stockholders and about 94,000 employees. The Southern Pacific is a large factor in the life and affairs of its territory. It spent \$207,000,000 in 1923 for wages, materials and supplies, in addition to \$20,365,000 for taxes. In your own county the Southern Pacific paid in taxes during the year of 1923 \$145,240.39 or 9.83 per cent of the total tax for the county. In the Cottage Grove territory the Southern Pacific last year spent \$500,000 for forest products. The local mills have sold to the Southern Pacific company so far this year 312 cars of ties with 350 cars on their books unfilled. We have about 150 men employed here, representing a payroll of about \$12,000 per month.

"The railroads provide their own roadbeds and maintain the same. Motor transportation is conducted over roadbeds provided by them, and the people find this is becoming expensive and the tendency is to demand a just return for the use of these roadbeds. "The railroads did the pioneer work that resulted in building up the country into which the bus and truck have come. As a result of this competition the Southern Pacific is not handling as much merchandise over its Willamette valley lines as it did in 1915. "As a result of bus competition the railroad has been compelled to reduce the amount of its service. This has been done only after strenuous efforts to keep trains on a paying basis. Reduction of railway service is a serious blow to the communities affected. "The only remedy I see for the situation is the placing of the buses and trucks upon the same basis as railroads, thereby creating competition upon an equal basis. I find that the people generally are taking the position that the trucks and buses should pay in full for damage done the highways."
