An author of syndicated articles,
writing in defense of woman's
new-found freedom, says that women
have found a new moral code
that means more common sense, a
code that prepares them to become
better mothers of better children.

The Eugene Guard gives away
the secret of how editors furnish
their tables so lavishly:
Following his annual custom at
about this season of the year, the
editor of the Cottage Grove Sentinel
prints a front-page story about the
biggest hen's-egg on record.

A black Minorea hen owned by
Mrs. Robert Mosby was the author
of this production. He doesn't say
so, but the fulsome nature of his
description leads us to suspect that
The Sentinel editor had, just before
he wrote his story, eaten the
identical super-egg for breakfast.

Tragedy seems to be the accom-
paniment of the realization of the
hopes and dreams of the builders
of Eugene. A. H. McDonald died a
few days before his dream of a
great and beautiful theater, the
Lowell, was realized. It was but
a short time before that Editor
Charles Fisher died just as his
hope for a palatial home for his
newspaper was to reach fruition.

A salesman from the east who
is making the rounds of the Coast
reports that the window shade
business this year is the best in
history. Well, people have a lot to
hide these days.—Eugene Register.

Did those of you who have moth-
ers remember them in a way to
make them as happy as they were
the day they first fondled you?

ness caused by Catarrh.

SOCIETY

Mrs. Earl Garoutte entertained
Friday at a 1 o'clock luncheon,
places being laid for twelve. Salmon
sweetpeas in artistic arrangement
were the centerpiece of the table
and the place cards bore flower
decorations of the same color. The
afternoon hours were spent at
bridge, Mrs. A. L. Thomas secur-
ing high honors and Mrs. Fred
Anderson receiving the consolation
prize. The guest list included
Mrs. C. H. Bussey, Mrs. Fred An-
derson, Mrs. W. A. Garoutte, Mrs.
H. A. Hagen, Mrs. Charles Hall,
Mrs. Ivan Warner, Mrs. Merville
Veateh, Mrs. Archie Proctor, Mrs.
Victor Kem, Mrs. Victor Chambers
and Mrs. A. L. Thomas. The lat-
ter is of Portland and is a house
guest at the home of her sister-in-
law, Mrs. Chambers.

Miss Frances Beaulieu and Miss
Isabelle Safley were hostesses Sat-
urday afternoon at the regular
meeting of the King's Herald
band held in the Methodist church
parlors, which were prettily decora-
ted with streamers of pink and
blue crepe paper. The study of
China was continued, following
which games were played. Re-
freshments of ice cream with
fresh strawberries and cookies
were served.

Mr. and Mrs. John Baker, Mr.
and Mrs. Lee Dugan and Mr. and
Mrs. M. P. Garoutte entertained
the Jolly Bunch club Friday even-
ing at another of its jolly dances.
Dainty refreshments were served
at the close of the evening.

Mrs. George Currin entertained at
dinner, Thursday in honor of the first
wedding anniversary of Mr. and
Mrs. Vernon Thomason, the bride
being her daughter. Immediate
relatives were the guests.

The women's relief corps held
its regular meeting Saturday after-
noon. Plans for Memorial day will
be completed at the next meeting,
May 23.

The W. C. T. U. held its regular
meeting Friday afternoon in the
Methodist church.

APPROACHING EVENTS

O. W. Hays' class of young
folks of the Christian Sunday
school will entertain the congrega-
tion at their regular monthly
church meeting Tuesday evening,
May 12. Musical numbers will be
given by the orchestra and a
special feature will be a short
musical skit, "The Husband's Mistake." Those having parts in the
latter are Leslie Hall, baritone;
Miss Delta Hopper, alto; Miss
Elsie Chestnut, soprano; D. H.
Temple, tenor.

Mrs. Fred Wright, Mrs. H. A.
Galloway, Mrs. L. McAboy, Mrs.
John Groves and Miss Estella Adams
will entertain the Presbyterians
ladies' aid society next Wednesday
afternoon in the church parlors.
"Peak Sisters," a short playlet,
will be given by a number of the
members.

Mrs. G. M. Scott, Mrs. T. C.
Wheeler and Mrs. Herman F.
Edwards, retiring officers, will en-
tertain the Constellation club
Thursday afternoon, at which time
officers will be elected.

Mrs. Herman F. Edwards and
Mrs. Ivan Warner will entertain
the Elmarites club Wednesday,
May 20, at a 1 o'clock luncheon
at the Anchorage in Eugene.

Mrs. W. W. McFarland, a non-
member, has invited the Joker
club to meet at her home Thursday
evening.

Long Enough.
He—Rather sudden, isn't it, I
don't see how a girl can marry a
man she has known only two weeks.
She—I don't know how she can
marry one she has known any
longer.—London Mail.

Paper Cups and Dishes
Made by Electricity

Exemplifying the many diversi-
fied applications of electricity, in-
genious machines are now used for
making paper cups and dishes by a
manufacturing concern in Brooklyn.
The inventor of these paper cups
is an interesting process. Mechanical
fingers on an ingenious electric-
driven machine pick up a single
disk of fine quality paper and place
it in a section of the machine for
pressing. This pressing gives the
cup its shape, plating the sides for
strength and rigidity. The piece is
then transferred to another unit of
the same machine, where it is steril-
ized by heating.
When the second step has been
completed, the cup has assumed its
final form with platted sides, natu-
ral curved lip and tumbler shape.
But, as a measure of added effi-
ciency, it is put through a third
process, being sprayed with hot
paraffin, which seals the joints and
gives increased rigidity and crisp-
ness. From this point the cup
passes into a baking chamber,
where the paraffin is drained off.
The finished cups are carried along
on an endless conveyor past a fan,
the breeze from which hastens dry-
ing.

Relieves Workers of
Stigma of Suspicion

To save workers in factories
which employ in their products
gold, silver, or precious stones from
suffering the indignity of being se-
lected for searching, a Danish en-
gineer has invented a special ap-
paratus.
Hitherto, the custom has been to
stop a certain proportion of the
workers leaving such factories at
night, thus apparently casting sus-
picion upon the individuals selected.
By the new invention the worker
asked to adjourn to the searching
room is chosen by a machine.
The apparatus consists of a con-
tainer holding a number of balls,
corresponding to the number of
workers engaged in the factory.
Some of the balls are made of a ma-
terial conductive of electricity. As
the workers pass to the exit they
press a button, when a ball is re-
leased. It rolls out of the container
and a white lamp glows for a mo-
ment. In such case the worker
passes on.

Wife Was His Memory

"Your story of the absent-minded
minister," writes a contributor to
the Youth's Companion, "reminds
me of a minister whom I knew in a
little Wisconsin town many years
ago. He had a wretched memory,
but for all that he was nothing less
than a saint.
His absent-mindedness was
chronic. He seldom could remem-
ber his text, and, being averse to
being depended on his good wife
to come to his rescue. He would
lean over the pulpit and say, 'What
was my text for today, my dear?'
'She would tell him, and he
would then proceed to preach a
fine sermon from it.
"Once Sunday after the singing of
the second hymn he opened his
Bible, and, leaning down, made the
usual request: 'My text for today,
my dear?'
'I don't know, I'm sure,' com-
posedly replied his wife. 'You for-
got to tell me!'

Butterless Land

The supply of fluid milk in the
Dominican republic is fairly ade-
quate and although it is in general
used for adults, modern methods of
production and distribution do not
prevail. A large amount of con-
densed, evaporated and powdered
milk is imported into the country
each year and one of the other of
these preserved milks is always
used for infant feeding. No butter
is made anywhere in the republic
and the demand for this commodity
in the local market is met by im-
portations chiefly from the United
States and Denmark.—New York
Times.

She Pittied the Lion

Uncle had just returned home
from an expedition into Africa after
big game, says the Tatler; he
was delighting all the family with
stirring tales of adventure in the
jungle.
"One of my hunters was so sav-
agely-bitten by a lion once," he an-
nounced, "that he had to have his
arm amputated."
There was a short silence while
the information sank in, and then
the small daughter of the house
said in a sympathetic voice:
"Whatever a pity, uncle; the poor
lion might just as well have had
it."

Do Not Force Plants

If a plant has been growing thrif-
tily for some time and then begins
to go back it probably needs a rest,
and no amount of forcing will do
any permanent good. During the
resting period a plant is better if
left entirely alone in a dry, cool
cellar. It will of its own accord
and without any attention of any
kind begin to put out new green
shoots. When these new shoots
show themselves the plant should
be given a thorough watering, a re-
potting if necessary, and brought
up into its place in the sun. After
it is growing well it may be given
fertilizer.

Shis and Snowshoes

Owing to the thick forests of
America the snowshoe has been
found to be more suitable for use
than the ski, which is preferred in
less wooded regions. The large
flat surface of the snowshoe fur-
nishes a larger plane of resistance
to the soft snow and by distributing
the weight of the wearer over a
larger surface does not break the
brittle crust on top of the snow,
which makes progress without snow-
shoes impossible.

Pointer for Those
Who Seek Knowledge

Once upon a time, according to an
old story, a young man went to So-
crates, the Greek philosopher, and
said: "Sire, I come to you in search
of knowledge. I have heard much
about you, and have come a long
way to find you. Will you not tell
me how I can gain knowledge?"
Socrates said, "Follow me." The
youth followed Socrates to a body of
water and was surprised to see him
wade into it up to his waist. He fol-
lowed him and Socrates grasped him
by the arm and head and thrust his
head under the water. He held him
there until it seemed the youth
must surely perish. He dragged him
to the shore and waited for the
youth to catch his breath; then
said: "My boy, what did you most
desire when I held your head un-
der the water?"
The youth replied: "Air."
Socrates said: "Go your way and
remember that when you want
knowledge as much as you wanted
air when you were under water,
you will get it."—Forbes Magazine.

One Place Where Rat
Is Not Thought Pest

A deity whose name is Ganesha
is worshipped by the Hindus.
Because Ganesha is always pic-
tured riding on a rat or attended
by one, the rat receives part of the
homage directed to the god. For
this reason many rats live in state
in the temple at Deshnoke, India,
where there is an old and interest-
ing shrine erected to this mythologi-
cal god.
Pilgrims prostrate themselves be-
fore a group of rats, which have no
idea of life beyond that of eating
everything available and keeping a
safe distance from cats and hawks.
But they represent the rat god,
Ganesha, and the temple in which
they live is sacred on account of
their presence. It is even called
"the Rat Temple."
According to Hindu mythology
Ganesha was the lord of the Ganas,
who were a group of inferior deities.
Ganesha removes obstacles. He is
propitiated at the beginning of any
undertaking. He is particularly en-
dowed with wisdom and judgment.

Scholars on Strike

Strikes are not a modern trouble.
One of the earliest and oddest
strikes on record is that which took
place in Oxford, England, in 1200,
when, in consequence of a peculiarly
outrageous aggression of town upon
gown, masters and scholars to the
number of 8,000 "downed tools" and
retired in high indignation to ad-
jacent centers of learning. The schools
were closed, the city was laid under
an interdict, and the trouble only
ended five years later—in the com-
plete humiliation of the erring bur-
gesses, who were compelled to do
public penance and accord large priv-
ileges to the university. When the
offended clerks finally condescended
to return, these "blacklegs," who
had conformed to lecture in defiance
of the will of the majority, were
punished by three years' suspen-
sion.

Early Adding Machines

That the ancient Inca civilization
in Peru possessed an adding and
calculating machine has been re-
vealed in the recent discovery by
excavators of a knotted cord, or
"quipu," in the ruins of a prehistoric
temple. The cord is sixteen yards
long and contains 100 knots. Di-
vided into ten unequal sections
these knots represent the odd num-
bers from one to nineteen. The
sections are of different colors, in-
cluding red, brown, yellow, blue and
green, and are separated by silver
beads, which represent the even
numbers from two to twenty. By
using this simple way of counting,
based on the decimal system, rapid
calculations can be made.—Moun-
tain Star.

How Cannon Are Spiked

In former times when the old-
fashioned type of cannon was used
the guns were disabled by driving
an iron spike into the opening at
the breech through which fire was
communicated to the powder. This
was called "spiking" the cannon.
It was done when it was necessary
to leave the guns behind, to prevent
their immediate use by the enemy.
Such disablement was usually only
temporary. The phrase, however,
is retained in modern military
usage. Spiking a cannon nowadays
means breaking or carrying away
part of the breech mechanism, mak-
ing it impossible to use the gun
without considerable repair.—Ex-
change.

Beggars' Trade Union

In China one of the most formi-
dable trade unions is that of the
beggars. Begging in that country is a
recognized profession, and there is
a properly organized guild of beg-
gars in most districts.
Each guild has its own president
and officers, and the members pay
an annual subscription equaling
about \$4 in our money. The offi-
cials of the guilds wield such pow-
er that they enjoy the protection of
the magistracy.
So far there has been no strike on
the part of the members of this
union, which is undoubtedly the
quaintest organization of its kind in
the world.

"The Mills of the Gods"

This is an old Greek aphorism
taken from the "Oracle Sibyllina."
The original, literally translated,
reads as follows: "The mills of the
gods grind slowly, but they grind
small." Longfellow, in translating
it, inserted the word "exceeding"
and made it read: "The mills of
the gods grind slowly, but they
grind exceedingly small." The same
thought is found in Pindarch and
other ancient writers.—Exchange.

Safe
Ella—Something is preying on
Ella's mind.
Jack—Don't worry; it will die of
starvation.

SUN AND AIR FOR STIMULANTS
By Ruth Malcomson
America's Most Beautiful Girl

WISE is the girl who can say,
as she used to when she read
her school lessons from a primer,
"I see the sun and the sun sees
me!" For one of the foremost
rules of health and beauty is to
get out into the open air and let
the sun see your face!
Frankly, I don't know why all
those artists down at Atlantic City
chose me from all the lovely girls
I saw there, to be "Miss America."
But I do know that if I am
anything to boast of, I owe
it to the regime upon
which my mother has
always insisted—a
regular and

natural life, with especial emphasis
upon the use of fresh air and warm
sunlight as my only stimulants. For
oxygen and sunlight are natural and
proper stimulants for the human
system. These two stimulants, un-
like all the artificial ones, do no
harm, but only good; and their
benefits are not temporary, but last-
ing.
Are you a "bridge fiend" or a
matinee hound? Then you can't
be getting the benefits of the tonic
effects of air and sunlight! Try
substituting a seat in the grand-
stand at a baseball game for a chair
at the bridge table. Or learn to
know the names of golf and tennis
stars by heart, by virtue of observ-
ing them frequently, rather than
those of stage and screen stars.
Avoid foul air, always. Ride on the
outside platform of the street car,
whenever possible, in preference to
its jammed interior.
Better still is "exercise on the
hoof." By this I mean exercise in
the fresh air. Merely going out
of doors will do you little good.

and indoor exercise, like dancing, is
excellent; but it is when the fresh
air and exercise are taken together
—vigorous action literally pumping
oxygen into the lungs—that the
greatest good results. Swimming,
for instance, combines the virtues
of exercise and fresh air, and it's
a wonderful aid, besides, in making
and keeping the body snappy. Long
walks will do wonders for any girl's
looks and the walking habit is an
easy one to acquire.
Finally, rise early in the morn-
ing. It's the morning air, you know,
and the morning sun, which do most

to stimulate beauty in your com-
plexion. The morning air will give
you an appetite, too. But be sure
you don't abuse that appetite by
an unhealthy breakfast. I never
drink coffee for breakfast or for
any other meal. Oranges, toast
and milk are good for the
first meal of the day; or, if
you must have your hot drink
at breakfast, let it be non-stim-
ulating.

She Wanted a Change

Betty had only lately been in-
structed in the matter of evening
prayers, and her performance was
exemplary until the occasion when
she startled her mother with the
petition: "Bless Thy little pig to-
night."
She was reminded that the cor-
rect word was "lamb," but refused
to return to orthodoxy.
At last, when pressed for the
cause of this stubborn naughtiness,
she replied that she was tired of be-
ing a lamb. "Every night," she pro-
tested, "it has been lamb, lamb,
lamb! So tonight I'm going to be a
pig, and tomorrow night I am go-
ing to be an elephant."

Girls:—You can't expect a feller
to love a girl with a red nose, col-
orless lips, dull eyes. Don't wait—
your "chance" might come tomor-
row. Better take Hollister's Rocky
Mountain Tea at once and be on
the safe side.—Kem's for Drugs,
Filing cabinets. The Sentinel.
