Leftover Foods

IT TAKES real thought and planning to use the leftovers in a palatable way. After company dinners there will always be some foods left and "that nothing be wasted," try some of the following:

Mexican Mash.—Take two cups of stuffing or any that is left, add an equal amount of bread crumbs, any leftover corn, salt and pepper to taste. Moisten the ingredients with leftover gravy, put into a baking dish and bake until well heated through.

Salad.—Take two cups of diced white meat of chicken, goose or turkey of any portion, one cupful of diced celery, one cupful of drained cooked peas, one-half cupful of shredded almonds, one-fourth cupful of chopped pickles, one tablespoonful of oil, one tablespoonful of lemon juice, a dash of red pepper. Let stand to season until ready to serve, then serve on lettuce leaves with a boiled dressing.

Cranberry and Cottage Cheese.—Put any stewed cranberry sauce through a sieve, if thick enough to mold pour into small molds; if not, add a bit of gelatin. Unmold and serve with a mold of well-seasoned cottage cheese and a spoonful of thick mayonnaise.

Chicken Soup With Rice.—Cut all the meat from the bones of the fowl and chop fine. Put the bones into a kettle, breaking them; add cold water to cover, at least two quarts. Simmer slowly for two hours. Add one cupful of hulled rice to the meat and pound together to a pulp. Strain the broth into this, then stir well and put through a puree sieve. When ready to serve bring to the boiling point, add one cupful of cream, season with a teaspoonful of salt and a dash or two of cayenne.

Potato Croquette.—Season leftover mashed potatoes with a pinch of mace, salt and pepper if needed. Add two tablespoonfuls of butter, one teaspoonful of onion juice, one beaten egg yolk, a sprig or two of finely minced parsley and mix well. Roll into balls or long rolls, dip into egg and crumbs and fry in deep fat. Serve garnished with sprigs of fresh parsley.

Scientists Now Know Composition of Atom

Fifty years ago, remarks Sir Oliver Lodge, we did not know the atom had a structure; but it has now delivered up its secret, and is found to consist of very minute and concentrated electric charges revolving round a nucleus, as the planets revolve round the sun. The discovery is quite recent that the same system of law and order that reigns through the heavens holds equally in the interior of the atom, so that there is an atomic astronomy growing up before our eyes, leading us to wonder if there is any limit to smallness any more than there is any limit to bigness, says the London Mail.

Among all these immensities man may appear insignificant and hampered by his animal ancestry. He has much to contend against and overcome. Sometimes he seems evil and ugly, but he is immature. He is in the process of making.

Time to Go

Owen owed Rogers \$20. Owen had successfully avoided meeting Rogers until now he had run full tilt into him. It was quite unavoidable, otherwise the meeting would never have taken place. Trust Owen for that!

They chatted for some minutes on a variety of subjects, and at last Owen, wishing to get away before the subject of the debt was raised, said:

"What's the time, old man?" Rogers pulled out his watch and, regarding it with a frown, replied: "Well, it's about time that you repaid that money."

"Oh," exclaimed Owen in alarm. "I had no idea that it was as late as that. I must be off. Good-by, old man!"

Lenny Really Didn't Know Weight of Hog

If old Lenny Foksett was anything more than deliberate, he was exasperating. He moved, spoke and lived at his own sweet will, and no one had ever been known to budge him. He came into the village store one morning, threw himself down on the bench in front of the counter and announced that he had just killed his prize hog.

"Guess how much he weighed, boys," he drawled. "Two hundred and seventy-five," ventured one of the loungers.

Lenny shook his head. "Others offered suggestions; the guesses grew so brisk that it began to sound like an auction. All sorts of weights were given, but to all of them Lenny merely shook his head. The others began to lose patience. From mere curiosity they began to long passionately to learn the weight of the hog and pass on to another subject.

"Well, for heaven's sake, how much did your old hog weigh?" somebody demanded. "We've guessed every figure possible! How much did he weigh?"

Lenny yawned. "Hi—hum. I dunno," he drawled. "I ain't weighed him yet."—Youth's Companion.

STAR MAKES A REAL RECORD

AGAIN Star flings a challenge to all cars in its price class. . . From Los Angeles to Yosemite—364 miles in HIGH GEAR!

Under strict observation—carrying as passenger an official observer who swears to the truth of these statements—a bonafide stock model Star adds this real Yosemite triumph to its long list of record power achievements.

364 miles in high gear, all the way, regardless of the almost impossible grades, through traffic, sandy and muddy roads, the Million Dollar Motor has scored a smashing victory—never before accom-

plished carrying passenger, irrespective of size or price.

Highest Yosemite Gas Mileage

By winning all Yosemite high gear power honors, Star followed close on the heels of its gasoline mileage victory in the 9th Annual Los Angeles to Yosemite Economy Contest, when the new Star Coach averaged 27.96 miles per gallon, the highest in its class. Ton mileage [weight] calculations gave first place to another [open type] car representative of a much higher priced class.
