**Take Your Time  
About Deciding  
On This  
Investment**

The only kind of shareholders desired by Mountain States Power Company are those who expect to keep their money invested in the Company, and to share in the dividends regularly paid year after year.

There are circumstances, of course, which may require any shareholder to dispose of his holdings, in which case he finds a ready market for the sale of his securities. But the great majority of the Company's shareholders are permanent.

As the Company's business grows it must make additions and extensions to render service. This means that new capital is required practically all the time. This demand provides an investment opportunity which will be kept open to customers, by encouraging small investments rather than large ones.

The Company's policy is to have many shareholders and to give customers the opportunity of participating in the wages earned on the invested capital.

The Company seeks your personal friendly interest primarily. The investment of your money brings you and the Company together as partners. Naturally partners should make up their own minds, and be fully satisfied of the wisdom of what they are doing.
