SCHOOL BOOKS AND
COCO COLA.

What have school books and a
popular soft drink in common?
Very little, but a moral may
be drawn by associating the two.
We have heard considerable com-
plaint during recent weeks concern-
ing the cost of school books. Many
can not be blamed for complain-
ing. Parents with but little educa-
tion in higher mathematics have
difficulty in dividing small in-
comes in such a way that they
will provide \$15 to \$40 worth of
school books for children who
probably have already pretty well
drained the family purse.

But here are facts to give pause:
The cost of school books for one
year for the entire United States
is approximately \$45,000,000. That
is not a sum to be spoken of
lightly. It is a tremendous amount
of money. Few of us have handled
that much in a lifetime.

In a recent interview the vice
president of the Coca Cola company
stated that his company sold 18,-
000,000 gallons of the drink dur-
ing the one year of 1924. There
are 100 drinks in a gallon and
each drink sells for five cents, so
that the total cost to the nation
for this one drink alone was \$90,-
000,000, or twice as much as was
spent for school books during the
same period.

The nation would have suffered
in no way had not a drink of
coco cola been sold. There was
no permanent good of any kind
from an expenditure of twice the
amount that was paid for school
books that give the pupils some-
thing of value to carry with them
through life.

The Sentinel has no purpose in
singling out this one drink. The
singles of others probably were just
as large, and the permanent good
just as little. It probably would
not be exaggeration to say that
the nation's soft drink bill is 25
or 50 times as great as its bill for
school books.

And that is no particular reason
why they should not be drunk.

But it is a reason why when we
complain about the price of a
necessity we should give thought
to the money we squander a nickel
and a dime at a time, the total of
which probably would easily pur-
chase all our necessities.

Our bill for tobacco is several
times as great as for our school
books.

Our bill for cigarettes alone is
many times as great as for our
school books, and no one can argue
that a cigarette ever did anyone
any permanent good.

Our movie bill is many times as
great as our bill for school books,
and our dimes and quarters go to
pay fabulous salaries. The movies,
at least, do us some good and
usually are educational. The movie
has become an institution and
will remain such and is mentioned
only to further illustrate that our
pleasures take what would permit
us to buy school books.

And moonshine whisky also drains
heavily upon the national purse.
For obvious reasons an itemized
account of our whisky business is
not available, but there is no doubt
that its cost is much greater than
our bill for school books, and what
we pay for booze is a total loss.
Saving a nickel now and then
from the cost of pleasures and
dissipation would enable us to
easily pay for our school books.

The Oregon Voter hits the nail
on the head when it says: "If our
motor association will appoint com-
mittees who can get in and out of
a newspaper office without pick-
ing a quarrel, there will be little
trouble in getting cooperation on
anything that is meritorious."

There is a proposal on foot to
license editors. Many of them
already take more license than
the constitution contemplates.
