TOO MANY SELFISH ONES.

The Eugene Register waxes facetious in making fun of some of the fool laws that we have. It relates the instance of the farmer who can't haul products to market for a neighbor without having a truck license, of the resident of Eugene who can't plant an addition to the city without getting the permission of the city planning commission, of the law prohibiting the use of two lines by one fisherman in Oregon's fishing streams, and some others that seem equally foolish.

The Register goes on to say: "Here is a suggestion, which is well meant, for candidates who crave to be legislators, but lack an outstanding issue: Let them sign a pledge to produce no bills, to vote for no laws other than those necessary for the conduct of the state's routine business, and to use all their efforts toward the repeal of the mass of useless laws now on the books. We have an idea that such a candidate would be elected by a vote that would amaze him."

The Register means well, just as did the legislators that passed the fool laws with which it has so much sport. No doubt we could dispense with many of our laws, but to ask a candidate to bind himself as the Register suggests is on a par with the passage of the so-called fool laws with which the Register would do away.

Such a candidate might be elected, but as soon as he took office he would have occasion to regret his pledge, for the very simple reason that those who exacted the promise from him would be the first to importune him to vote for some special bills in which they were interested.

Some candidates do make a record of introducing few bills, but none has ever made a record such as the Register suggests it would

like to see made, and none ever will.

It might be well to observe also that these fool laws to which so many object are the result of the fact that there are many selfish ones ready to take advantage of any loophole. Some of the selfish ones are among those who cry about fool laws.

The truck licensing law, for example, does work a hardship in many instances, but were a provision made that one farmer could haul for another without taking out a truck license, some would find a way to do hauling for their neighbors on a commercial basis and yet avoid the payment of the tax.

We all know that the fish hogs who frequent our streams are responsible for the stringent laws that work a hardship in a few instances.

We all know that there are a few with so little regard for the rights and welfare of others that the necessity to get permission of the city planning commission before an addition to a city may be placed is a wise one.

It is the old, old story of the self-suffering because of the selfish disregard of the few for the rights of others—and it will ever be thus.

Albany citizens were puzzled day before yesterday when they awoke to find their streets covered with a fine powder. Maybe the flappers are shedding. —Eugene Register.
