BOYS WANTED.

Boys wanted—50 or more of them—but they must be unusual boys. Education at college, fraternity houses and on the football field is not necessary, nor sufficient.

They must be boys with a serious purpose in life, boys who have definitely set themselves to learn some business in which they can rise. They should be smart boys, but not "smart."

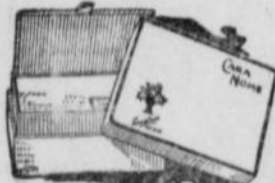

They must be boys who have not learned too many things which they must unlearn, but they must be boys who have learned many things of the right kind.

They must be boys who are not too smart to learn something more, yet they must not come expecting their employer to give them the foundation of knowledge.

Among other things, they must be courteous boys and they should be boys of good breeding, boys with respect for their elders and

SCHLAGE BUTTON-LOCKS installed in 10 minutes

Each SCHLAGE Button Lock comes to you as a single self-contained unit. No adjusting necessary. No complicated mortising. Simply drill two holes in the door, slip the lock into place, and draw up with two machine screws.

just press the BUTTON in the knob to Lock
just turn the KNOB to Unlock

Convenient. Charming. Distinctive. No building completely modern without Schlage Button Locks. Types for all doors. Glass knobs or metal knobs in all U. S. standard finishes.

Knowles & Graber

Society

for those who know more than they do. They must be willing to learn and willing to make money for the boss.

They must be boys who will not be satisfied to remain at the bottom, but boys who will not expect to hit the top rung the first week, or the first month, or the first year.

They must be boys with new ideas but with respect for the ideas of old fashioned folk who have made possible the opportunity that is open for them.

They need not know much about the correct way to wear a dress suit or the correct angle at which a cigarette should be poised, but they should be boys who wear well with those with whom they come in contact and who have mental poise.

To such boys there is an opportunity in a business that is going to revolutionize an industry. To such boys there is an opportunity to get in on the ground floor and rise to the roof.

The call for such boys has been made by a Cottage Grove employer. So far he has not been kept busy turning away applicants, although there are plenty of boys who claim they want jobs.

The statement is often made that there is no more child delinquency now than there was when those of us who are old enough to be grandparents were children.

If such is the case, we must have something to the growing generation, for with the greater opportunity for delinquency they must be vastly superior to their parents if they have come through as clean as those who had far fewer temptations and who had parents who were much more on the alert than are parents today.

Paris dispatch says that the latest edict among women is suspenders. Paris is late. We saw a co-ed on the golf links with 'em a month ago.—Corvallis Gazette-Times.

We shall await expectantly from the always observant Claude Ingalls, editor of the Gazette-Times, definite and detailed information as to what the co-ed had the suspenders hitched to, if anything.

The news dispatches tell us that Loretta D., formerly the mount of the late Governor J. Withycombe, was ridden by Governor Pierce in a recent livestock show at La-Grande. It must have been a pleasant novelty for the governor to be the one to do the riding.

Eugene Guard: Down at Cottage Grove, temporary movie capital of the northwest, the male troupers play baseball when they are not acting. They say Buster Kenton plays shortstop with a long face.

Ashland Tidings: You can't tell these days whether a girl is good looking or not, unless you catch her with her face just washed.

No one has yet complained because talk remains on the free list. We are able to meet all competition in any market.

The father gives the bride away—the groom's actions do the same for him.

Silence is golden—that's the reason there are so many poor people.

PROFESSIONAL CARDS

DENTISTS

H. W. TITUS, D. M. D.—Dentist. Modern equipment. First National Bank Building. Hours, 9 to 12 and 1 to 6. Evenings and Sundays by appointment. Office phone 10, residence phone 212-R.

NOTARY PUBLIC AND COLLECTIONS

HARRY W. NEET.—Collections and Notary Public. Bader building, Cottage Grove.

THREE SISTERS ONCE MIGHTY MULTNOMAH

(Continued from first page.)

considered the obsidian, which was used for arrowheads and spear heads, of intrinsic value.

"Perhaps a thousand years later," continues the story, "the white man, urged westward by the same impulse that brought his Asiatic predecessors eastward, reached the yellow pine slopes of the eastern Cascades. Here at intervals between labors and their conflicts, they gazed westward to the three beautiful mountains, and, in their admiration, named them the 'Three Sisters.'

"Later settlers in Oregon always have approved the name and now the fame of the beauty of this region is known in all parts of the world."

In beginning his story of Mount Multnomah, the author takes the reader back to the coeene period—ten million years ago. What is now Oregon was then two great land masses, one in the general vicinity of the present Blue Mountain region and the other in southwestern Oregon. At the beginning of this coeene period, a great break in the earth's crust eventually afforded deep-seated liquid rock an opportunity to escape to the surface.

This break gave origin to the present Cascades and its then numerous volcanoes.

Mount Multnomah was one of the volcanoes that began to develop with the beginning of the oligocene period, the second period, but it was not until the next era, called by geologists the miocene period, that the mountain began to belch out an enormous flood of basic lava.

"As a result of this intense volcanic activity," says Dr. Hodge, "Mount Multnomah was built into a gigantic cone more than 10,000 feet high, with a base extending from the vicinity of Belknap Springs on the west, Three Sisters on the east, beyond Mount Washington on the north, and to Elk Lake on the south."

It was at the close of this third period, the miocene, explains Dr. Hodge, that the top of the mountain was destroyed. Dr. Hodge prints out that the top was either blown off by a gigantic explosion or that it collapsed. He gives greater credence to the explosion theory, however.

The diameter of the caldera thus formed was about 8 miles, and compares favorably with great calderas in the world. They follow: Lago di Braeciano, Italy—diameter in miles, 6 1/2; depth, 300 to 500 feet. Lago di Bolsens, Italy—diameter

NOTICE TO CREDITORS.

In the county court of the state of Oregon, for Lane county.

In the matter of the estate of Gustave G. Lebbe, deceased.

Notice is hereby given by the undersigned administrator of the estate of Gustave G. Lebbe, deceased, duly appointed by the county court of the state of Oregon, for Lane county, as such administrator, that all persons having claims against the said estate are hereby notified to present the same, duly verified, to Cecil E. Caldwell, administrator, in Cottage Grove, Lane county, Oregon, within six months from date of this notice.

Dated at Cottage Grove, this 3rd day of June, 1926.

CECIL E. CALDWELL, Administrator of the estate of Gustave G. Lebbe, deceased. Herbert W. Lombard, Attorney for estate. jn2j1e(T)

AMAIZO OIL for Salads. A-MAIZING! Includes image of a bottle and a salad.

in miles, 10 1/4 x 9. Gulf of Santorian, Grecian archipelago—diameter in miles, 6. Krakatau, Straights of Sundra, between Java and Sumatra, East Indies—diameter in miles, 5; depth, 3000 feet.

Crater Lake, Oregon—diameter in miles, 5; depth 500 to 2000 feet. Dr. Hodge, who came to the University of Oregon in 1920, has the distinction of having prepared 2 of the 5 topographic maps of the High Cascade areas. The United States forest service has prepared the other three. Dr. Hodge, who is 39 years old, took his bachelor's and master's degree at the University of Minnesota, and his doctor's at Columbia university, New York. His work in geology has been extensive, he having been first assistant geologist of Pennsylvania, consulting geologist to board of appraisal and appointment in New York city, geologist for Porto Rico and acting head of geology at the University of British Columbia before coming to Oregon. He intends to make a specific study of the Pacific Northwest, writing his data in a way which will be of interest not only to scientific men, but to the average interested reader.

"Human Wreckage" Shown Here. "Human Wreckage," starring Mrs. Wallace Reid, was shown Sunday evening at the Christian church. This picture, which was brought here through the efforts of the Anti-Narcotic Educational association, shows the destructive effects of the use of dope. In connection with the picture, W. J. Herwig, general secretary of the association, gave a lecture on the drug evil.

Automobiles Are Rifled. Members of the Masonic lodge who parked their cars outside the building during lodge meeting Wednesday night found that the pockets of all cars to which entrance could be gained had been rifled during the meeting. Nothing of any value was reported as missing. No attempt was made to take any of the cars.
