Three Stations Send Same Music Program

Standard Oil Company Contributes \$25,000 for Great Link-Up on Air.

With the assistance of the Standard Oil company of California twenty-one symphony concerts are being broadcast simultaneously, Sunday afternoons, by stations KGO, Oakland; KPO, San Francisco, and KFI, Los Angeles, constituting one of the greatest link-ups of radio stations ever undertaken on the Pacific Coast.

Some weeks ago a public subscription was started in San Francisco for \$25,000. Listeners of the Pacific coast were asked to send in contributions to this fund, which was to be devoted to protect the San Francisco Symphony orchestra against loss in box office receipts because of the fact that concerts would be broadcast. Approximately \$15,000 was raised and the Standard Oil company of California agreed to subscribe the sum necessary to make the undertaking a reality. In addition, the Standard Oil company has undertaken the expense of transmitting all of these concerts over telephone wires to KFI, Los Angeles, in order that the people of southern California may also have the benefit of these concerts.

The Standard Oil company has made available each week at its service stations programs for the concert of the following Sunday. These programs will not only list the compositions to be played but will also contain a description of each composition, which will enable listeners to follow the music and better understand the story the composer wishes to tell.

The concerts start at 2:45 Sunday afternoons.

What Is a Diuretic? People Are Learning the Value of Occasional Use. EVERYONE knows that a laxative stimulates the bowels. A diuretic performs a similar function to the kidneys. Under the strain of our modern life, our organs are apt to become sluggish and require assistance. More and more people are learning to use Doan's Pills, occasionally, to insure good elimination which is so essential to good health. More than 50,000 grateful users have given Doan's signed recommendations. Scarcely a community but has its representation. Ask your neighbor!
