Bridge Falls at Lorane.
 A bridge on the road leading from Lorane to the upper Siuslaw and about three miles below Lorane collapsed at one end Monday and traffic has been held up or detoured around it since, pending repairs. A county bridge crew has been sent out.

One of the piers slid out, due perhaps to the soft condition of the bank and the structure dropped 12 feet.

This bridge spans the upper Siuslaw river, which is but a creek in proportion at that point, and the banks are high and precipitous.

Elk So Friendly He Is Killed

PORTLAND, Dec. 30.—(United Press.)—Somewhere in the Oregon woods there roams a widowed Mrs. Elk, and it is all a result of the contaminating influence of civilization on her one-time lord and master.

Today a wonderful set of antlers adorns the wall of a room in the game commission office, receipt of the antlers marking the end of the destructive career of a bull elk who was too friendly.

The elk, raised in captivity, did not care for the freedom granted

him later in life. He liked the atmosphere of farm yards and wanted his wilderness saturated with civilization.

Oreochards were his delight, and he selected food from the trees with rare judgment as to its ripeness. Finally he became such a pest on the farms of Marion and Lane counties that he was killed on order of the state game commission.

"But, I can't see a thing in this hat." "Madame, when you wear our hats you're supposed to have seen everything."

Start the New Year With a Loose Leaf Ledger

The expense is less after the first year, while the loose leaf system has many advantages over the use of bound books, to which nothing can be added, from which nothing can be removed.

Unusual leaves of a loose leaf system can be used the following year. Unused leaves of a bound ledger are wasted.

At the end of each year the sheets for that year are put away in an inexpensive storage binder.

Save Yourself Inconvenience By Anticipating Your Needs in Printing

You are likely to say that you are too busy to check up on your printing once in a while, that you are too busy with business. The printer has the same trouble and, while he will exert every effort to get out immediately the rush order (which could just as well have been ordered several days before), sometimes to do so is a physical impossibility.

Of course it is a favor to the printer to have copy in his hands several days before a job of printing is needed, but it is at the same time good business for the person wanting the printing, for he has given the printer time to get him out the last sheet of the letter head, statement, or whatever it happens to be, has been used. The printer and the buyer of printing can profitably work together in the manner suggested.
