

ARCADE Theatre WEEKLY PROGRAM

Thursday, June 16 "RICH BUT HONEST" With Nancy Nash and Clifford Holland.

He was rich but honest and she was poor and honest—but she didn't know he knew it. A laughter film of young romance. A world of laughs.

Comedy "On With the Dance" and International News.

Friday, June 17 "BEWARE OF WIDOWS" With Laura LaPlante and Bryant Washburn.

You can flirt with single or married women but Beware of Widows. One of the biggest comedy sensations of the year. Don't miss it if you like to laugh.

Comedy "Whispering Whiskers."

Saturday, June 18 "OUTLAWS OF RED RIVER." With Tom Mix and Marjorie Daw.

A drama of the fighting Texas rangers. He is a Falcon of the Law and she a bandit spy—but love sweeps both into the arms of romance.

Comedy "Slippery Silks."

Sun., Mon., June 19-20 "ROUGH HOUSE ROSIE" With Clara Bow and Reed Howes.

She spent a night in jail and almost wrecked it. The story of a girl who got her men by treating them rough. What a kick you'll get from the prize fight climax of the best picture Clara Bow ever made.

Comedy "Jane's Hubby."

Tuesday, June 21 "HANDS OFF" With Fred Humes.

Here is a sure-fire Western with all the action and thrills that make a picture real entertainment. If you like a good western outdoor picture—don't miss it.

Comedy "Somebody's Fault."

Wednesday, June 22 "DANCE MAGIC" With Ben Lyons and Pauline Stark.

A title that explains the picture. Two of the best young stars on the screen today with a fine story make a good picture.

Comedy "Lyn' Tamer."

Always give the Home Print Shop first chance.

CLARA BOW "ROUGH HOUSE ROSIE"

With REED HOWES ARTHUR HOUSMAN A Paramount Picture Sunday-Monday, June 19-20 Arcade Theatre

SOCIETY

Mrs. R. F. Van Deine was hostess Tuesday afternoon for the Tuesday Bridge club, entertaining with a 1 o'clock luncheon. The afternoon was spent playing bridge and Mrs. Van Deine held high score. The luncheon table was centered with a bowl of deep pink sweet peas and pale tinted sweet peas were room decorations. The last meeting of the club for this season will be held in two weeks when the members will go to the summer home of Mrs. Gavin Dyott on the McKenzie river for a house party.

The Past Matrons club will hold its annual picnic Monday afternoon on Anlauf park. Anyone wishing information regarding transportation may obtain this by phoning Mrs. Anna Graham.

The Research club met Tuesday afternoon in the city library for the closing meeting of the season. The general subject of travel was continued and Alaska was the special topic for study. Mrs. A. L. Van Osdel, program leader, told several personal experience on a trip to Alaska as an introduction to the subject. She also exhibited baskets, curios and photographs of Alaskan scenery, people and animals. The general program was as follows: "General description of Alaska," Mrs. D. P. Cameron; "History of Alaska," Mrs. F. E. Mendenhall; "Productions of Alaska," Mrs. M. S. Power; "The future of the Country," Mrs. W. Baker; "Volcanoes," Mrs. D. D. Roberts; "Alaskan Seals," Mrs. D. A. Forbes; "Alaskan Dogs," Mrs. R. C. Quigley; "Reindeer," Mrs. D. C. Bosley.

The Latham Community club will meet Friday afternoon at 2 o'clock at the home of Mrs. I. C. Walker.

Mrs. J. Q. Willits and Mrs. Dale Hawkins entertained informally Wednesday afternoon, honoring Mrs. George Wharton of Mountain Home, Ida., who with her husband is a house guest of Mrs. Willits. Mr. Wharton is a nephew of Mrs. Willits.

A group of young people from here will motor to Eugene this evening to attend a party given by Miss Lucile Cornutt, honoring Miss Virginia Bosley, who is visiting here from Palo Alto, Cal. Both Miss Bosley and Miss Cornutt are former Cottage Grove residents.

C. H. Sedgwick to Speak. C. H. Sedgwick, Creswell attorney, will be the speaker at the Sunday evening service of the Presbyterian church. He will tell of the recent Presbyterian general assembly held in San Francisco. He was a delegate from this Presbytery.

At the forenoon service Holy communion will be held and Pastor Duncan P. Cameron will preach on "What is Man?" This is the second in the series on outstanding questions.

Attendance at the Sunday school last Sunday was 192 and an effort is being made to increase that to 200 this Sunday.

Church News

Methodist Church.—John A. Llan, Pastor.—Sunday school at 9:45; preaching service at 11; Epworth league at 6:30; prayer hour, 8 Thursday. A welcome at every service.

Christian Church, the "home-like" church—Cleve Taylor, minister.—Sunday school at 9:45, sermon at 11. Christian Endeavor at 6:30, evening service at 8.

Presbyterian Church.—Duncan P. Cameron, minister.—Sunday school at 10 a. m.; public worship at 11 a. m.; Junior Endeavor 7:30 p. m.; Senior Endeavor 6:30 p. m.; evening service at 8.

Grove Singers in Recital. Mrs. Victor Kem, Mrs. Roy Leonard, Miss Helen Ostrander and N. J. Nelson Jr. joined with a group of Eugene students of Arah Hoyt Rae in a formal recital Friday evening at the home of Mr. and Mrs. C. P. Deveraux of Eugene. The affair was invitational and 125 attended. Maxine Nelson and Miss Ostrander played the accompaniments.

The selections sung by Mr. Nelson were: "The Trumpeter," Dix; and "Mother Machree," Ball. Mrs. Kem sang "Amy's Song" from Cadman's opera "Shannensis" and "Oft Have I Seen the Swift Swallow," Delaqua. Pleasing selections were sung by Mrs. Leonard and Miss Ostrander.

All the Grove performers were well received, according to Arah Hoyt Rae.

"ROUGH HOUSE ROSIE" IS FAST MOVING FARCE

"Rough House Rosie," the Clara Bow starring picture that has made critics search for new superlatives, will be shown Sunday and Monday at the Arcade theater.

This new Paramount production comes with the reputation of having broken box office records everywhere, rivaling her sensational success in "IT," the Elinor Glyn story that added a new word to slangdom.

In "Rough House Rosie" Clara is Rosie O'Reilly, the belle of Tenth Avenue and sweetheart of big fisted Joe Hennessy, who is about to engage in battle for the middle-weight championship of the world. It brings Clara to the screen as a chorus girl, as a pugnacious defender of her honest name, as an alluring member of the fast-stepping upper social set and as the best ringside supporter a fighting man ever had.

Reed Howes, a strapping handsome youngster, plays opposite Miss Bow in this Frank Strayer production. Doris Hill, one of filmdom's best known beauties, has an important part as do Arthur Housman and Douglas Gilmore.

Nunnally Johnson wrote the story. The adaptation was prepared by Max Marcia. Ethel Doherty and Louise Long wrote the screen play.

Her Kewpie. Father—"There was something funny about you last night, daughter."

Offspring—"I know, but I sent him home as early as I could."—Boston Beanpot.

Went Inland to So Seek Safety From Enemies

Many of the islands in the Solomon Group display evidences of having been thickly populated along the shores, though all of the villages now occupied by natives are back from the sea. Their present location was necessitated by the fact that for perhaps centuries the natives living in one village would make raids on the villages of other islands, killing many and taking as many captives as possible, writes Robert W. Williamson in "The Ways of the South Sea Savage." Portions of the coastline of Kulambanga Island bear evidence of having been thickly populated, but these inter-village conflicts have long since driven the coast inhabitants into the interior. There are, however, several small villages of primitive natives along the shores of neighboring islands, and since the coming of the white man's rule, wars among villages have been put down so that these coastal villagers have little to fear.—Detroit News.

Character of Glass Only Recently Known

The manufacture of glass antedates authentic history. It is only about three-quarters of a century, however, since its true character was ascertained. It is now generally conceded to be a salt—a chemical compound resulting from the union of an acid with a base. The acid is silica, the same that is found in quartz, or the quartz particles of sand. Hence the use of sand in its manufacture.

The glass may be potash (or soda), together with alumina and lime—or lead may take the place of lime. Lime makes a hard glass, one less susceptible to acids and suitable to windows and chemical purposes. Lead, a softer, more fusible and more lustrous article, suitable for optical instruments.

All acids act to some extent on glass, especially if the latter has an excess of alkali. Even wine may corrode the bottles wherein it is contained. The moisture of the air often dissolves out the alkali, causing the rainbow-like color (iridescence) of some window panes.

Lucretia Mott's Diplomacy

Lucretia Mott, who helped to form the anti-slavery society in Philadelphia in 1833 and who soon afterward founded the Female Anti-Slavery society, took an active part in the affairs of these societies. When a New York anti-slavery society session was broken up by a mob, many of its speakers were roughly handled. Perceiving that many of the women were afraid, Mrs. Mott said to her escort, "Won't three look after some of the others?" "But who will take care of you?" she asked.

"This man," laying her hand on the arm of one of the roughest of the mob, "He will see me safely through." The astonished man, with respectful manner, took her to a place of safety.—Kansas City Star.

Classes of Villainy

Villainy is divided into the amiable and the rude. The road agent bluntly holds up his victims at the point of a pistol. The statesman amiably accomplishes his villainy with a burdensome appropriation, or with a war which causes more deaths in a single battle than road agents ever caused. We all engage in villainy more or less, and it is always a mistake. Honesty would be easier and pay better in every way. We have never been able to get rid of the old barbarian's notion that when he saw anything he liked he had to take it.—E. W. Howe's Monthly.

Find Old Reflectors

In an iron case, concealed behind a wall, the first of the two great telescope reflectors with a four-foot aperture constructed 139 years ago by Sir William Herschel, the famous astronomer, for his 40-foot astronomical telescope, has been found during alterations to an old cottage adjoining the observatory house at Slough, England. Sir William Herschel devoted his life to the construction and use of reflecting telescopes for astronomy, and the fame of his instruments was rapidly spread by the brilliant discoveries which he accomplished by their aid.

Led First Crusade

Peter the Hermit, the famous preacher of the crusades, was a monk of Amiens, in northwestern France. Toward the end of the Eleventh century he roused western Europe by his vehement recitals of the indignities heaped upon Christian pilgrims to the Holy land by the Mohammedans. He led a crusade of hastily raised volunteers, most of whom perished. Later Peter saw Jerusalem taken by the regular army. He returned to Belgium, and became prior of Huy, near Liege, where he died in 1115.

Railways Old as Solomon

When asked by her teacher, "In whose reign do we first hear of railways?" a little girl replied, "In Solomon's."

She was asked to think again, but persisted in her original statement, and the teacher then inquired why she thought so.

"Because," replied the little girl, "we are told in the Bible that the queen of Sheba went to Jerusalem with a very great train."

Mental Attitude Counts

Success is the result of mental attitude, and the right mental attitude will bring success in everything you undertake.

Love Not a Flower

Love is not a flower. It cannot be revived by putting it into a vase. It's a flame, and when it's out it's out.—Embers.

Fruit Transportation Solution Is Reached

Shippers Believe Key to Problem is "Gassing" to Retard Maturing.

LONDON, June 16.—(U.P.)—"Gassing" fruit to prevent its maturing too soon is the latest experiment being conducted by fruit shippers in their endeavor to have their produce travel thousands of miles without depreciation.

According to a recent report published by the department of scientific and industrial research here, the ripening process of fruit is retarded considerably by replacing the carbon dioxide, part of the oxygen in the air in which the produce is stored.

This, it appears, amounts to restricting the breathing activities of the fruit, which in turn, delays maturing; without, however, impairing either the taste, appearance or the length of time during which it can be displayed in ordinary atmospheric conditions. Indeed, although "gassed" fruit is prevented from breathing normally during its storage, as soon as it is brought out of its travelling quarters, it resumes its normal course of development and when displayed in the windows of fruit stores, keeps just as well as fruit which is transported according to the methods in vogue.

Although it is expected that the new method will revolutionize the transporting of fresh fruit over great distances in the future, for the present, it is considered merely in the light of an experiment which needs to be continued for some time before it becomes of practical value to the trade.

SANTA CLARA IS HOME OF JAVELIN CHAMPION

SANTA CLARA, Cal., June 16.—(U.P.)—This city believes it is the home of one of the greatest and most versatile girl athletes in the world.

She is Margaret Jenkins, former student at San Jose college. Miss Jenkins' latest athletic honor was received recently when she shattered the world's record for the javelin throw in a meet at Fairfax. She hurled the Greek spear 123 feet. The former record was held by Lillian Copeland of Pasadena and was 116 feet.

Last year she won a prize offered to the man or woman, member of the Santa Clara County Rod and Reel club, landing the biggest trout of the year.

For four years she held the Santa Clara county women's singles tennis championship and she has come

within ten feet of the world's record baseball throw. She is a good baseball pitcher; she can fence and is a regular William Tell with a bow and arrow.

Louis J. Taber, master of the national grange, recently, spoke the following great truth: "The world must have food. Civilization, progress, industrial achievement or concentration of population and wealth cannot possibly find a substitute for the farmer. This being true, the agriculture of tomorrow must be guided by intelligence and brain power; both coordinated and directed so wisely that it will reach the maximum of efficiency. Consequently, organizations like the grange have a constantly increasing field of activity in the years ahead."

SKAGGS SAFEWAY STORES Distribution Without Waste If You Could Sit In— Meetings of all salesman, managers, district managers and others connected with our stores and markets are held in each district regularly. If you, as the patron, could sit in at one of these meetings and hear the plans and discussions of ways and means for constantly improving our service to you and eliminating waste, you would readily understand why our stores and markets are so much more desirable places at which to buy all of your foods. The whole thought at these meetings is "How can we give the public better merchandise and better service at less cost?" and the free exchange of ideas enables us to solve this problem.
