Women of East Eschew Facial Calcimine, Paint

Mrs. W. E. Burkett Finds Much in East That Is Worthy of Praise.

Users of facial calcimine and paint are not as common among girls of Rochester, N. Y., as they are in the west, in the opinion of Mrs. W. E. Burkett, who returned recently from there, where she attended a national conference of the Free Methodist church as delegate of the southern Oregon district. Girls of that city bob their hair as much as girls of the west but fewer older women have bobbed their locks. Both women and girls in the east wear their dresses longer than do those of the west. Not one boy or man out of ten carries a smoke between his lips on the streets in Rochester, Mrs. Burkett said.

Many places were visited by Mrs. Burkett, who was away for almost two months. She said that, though Oregon and especially this city were her choice, she could see many good qualities in other states. She was greatly impressed with the thorough methods of farming used in northwestern Kansas, where not a foot of soil is wasted. Iowa, Missouri and Illinois, with their fields of wheat, corn and clover, were a joy to look upon. Mrs. Burkett said that because of the flooded condition of the Mississippi and Missouri river bottom lands, thousands of acres of farm land are not in cultivation this year. In spite of this the crop outlook as a whole is very good.

Nevada, since irrigation projects have been completed, has changed greatly since Mrs. Burkett was there eight years ago, when there were great stretches of desert which produced only sage brush. This desert now produces heavy crops of grain and hay.

Roads in the middle west are not as good as in Oregon. There are few paved roads, which Mrs. Burkett said are called hard roads (with accent on the hard) or slab. Macadam and dirt roads are often almost impassable after a hard rain.

Second Brood Codling Moth Here. It is time to spray for the second codling moth on apples, it is announced by C. E. Stewart, county fruit inspector. The formula for this spray is given by him as follows:

"Use dry lead arsenate at the rate of two or two and a half pounds to each 100 gallons of water. Apply within the next five or six days.

"If there is any anthracnose in apple orchards use the arsenate in combination with the 4-4-50 Bordeaux mixture and cover the trees as well as the fruit."

N. J. Has Time of It Sending Tobacco To N. J. Sr.

N. J. Nelson Sr., who recently removed from here to Canada, finds it difficult to smoke the kind of tobacco he can buy in the country across the border, and N. J. Nelson Jr., who still lives here, finds it difficult to get to N. J. Sr. the kind of tobacco the latter likes.

N. J. Jr. sent a package of dad's favorite brand, but a few days later it came back without comment but with postage paid. Nelson Jr. could not understand how the postage charged to be prepaid but he surmised that the package must have been incorrectly addressed or something and probably got to the wrong person, so he tried again and again the package came back with postage prepaid. This time it was followed by a caustic letter from Nelson Sr., who said, "I'm tired of paying postage sending that tobacco back. If you're going to send it again, put it in pound packages. The Canadian government won't permit tobacco to come into the country in larger packages." Postage to the amount of \$1.21 had been paid in sending back and forth the tobacco that Nelson Sr. did not get and 45 cents was paid on another package which contained pound packages only. This has not been returned.
