## Two DETROITS would fit into "DUNLOP CITY"

Throughout the world the productive Dunlop properties cover so vast an area that—if combined into one place—they would form a "Dunlop City" of over 100,000 acres.

BEFORE Detroit started to make motor-cars, Dunlop had founded the pneumatic tire industry.

Thanks to the automobile, both Detroit and "Dunlop City" have grown tremendously.

Now Detroit reaches out over 52,686 acres, while "Dunlop City" covers over 100,000 acres.

And even greater than the size of "Dunlop City," is Dunlop's world-wide reputation for building uniformly supreme Dunlop Tires.

Supreme quality made possible Dunlop's great size. In turn, Dunlop's great size makes possible this same supreme quality, at lower prices.

You can expect more of Dunlops.
