The idea is to have various members furnish information regarding the candidates for political office. It is possible that debates will be a part of the program. A committee composed of Miss Stella Adams, Mrs. F. C. Houser and Mrs. Hattie Hart was appointed to assist in distributing political literature to the various lumber and mining camps in the district. Following the business meeting a social hour and refreshments were enjoyed. The next meeting will be held August 10 at the home of Mrs. L. McAbey.

At the business session plans were made for a supper to be given at the church Friday, July 27, to which the public is invited. The proceeds will go to help pay the remainder due for repairing the church auditorium last spring. Games furnished entertainment for the afternoon and at the tea hour light refreshments were served.

The Glenshire class of the Methodist Sunday school class held a picnic at the Hanna place east of the city yesterday. A number motored out in the early afternoon for swimming and were joined at supper time by others. Volley ball games and group singing around the camp fire were entertaining features following supper. More than thirty were present, including the families of class members. C. E. Umphrey is teacher of the class.

M. P. G. club members and their families gathered at the Dr. Ashby home Tuesday for a covered dish supper. Thirty-five were present, including Mrs. Hamilton Hale, who is here from Illinois visiting relatives, and Dr. and Mrs. Walter Schaefer of Eugene. The evening was spent in social conversation. Supper was served at a long table placed on the lawn near the river bank.

The Past Matrons club held a 1 o'clock luncheon Monday at the Boswell Springs hotel. This took the place of their annual picnic and members were privileged to bring guests. The afternoon was spent with needlework and cards. Special guests were Mrs. Nancy Oglesby, Mrs. D. H. Hemenway, Mrs. George Knowles, Mrs. Charles Van Denberg and Mrs. A. W. Swanson.

The Presbyterian missionary society will meet at 2:30 o'clock Wednesday afternoon at the home of Mrs. L. W. Coiner, with Mrs. R. L. Stewart as joint hostess. Instead of taking gifts for the Christmas box to be sent to foreign lands, as is the custom this time of year, members have been asked to take a money contribution.

The W. R. C. met Saturday in I. O. O. F. hall for their regular quarterly dinner. Twenty-five were present including Comrade William Fuson and Mrs. Belle Sweeney, a special guest. Following the dinner initiation work was exemplified for Mrs. Adria Henry. Mrs. Carrie Hemenway, who was a dele-

gate to the recent Roseburg convention, gave her report.

Few Places Need Labor. C. H. Gram, state labor commissioner, in summarizing the seasonal labor conditions over the state, indicates that there will be "a surplus of workers on hand all through the season." The only exception noted was at Hood River, where the statement was made: "We need many more men to thin apples and can also use more women in the cannery. Apple thinning and raspberry picking will begin in about a week. There is not enough help in sight to take care of the work." At Marshfield there was a slight shortage in skilled loggers and dairy hands.

HOME TOWN NEWSPAPER.

The home newspaper, as an institution, has survived many difficulties; the onslaughts of opposition, the increase in cost of publication, the peril of unpaid subscriptions, the uncertainty of advertising patronage, the problems of competition, and the hazards of its own mistakes. Through all this the home newspaper still lives. The newspaper is a growth—a development—made possible by the co-operative and receptive spirit of the people. It is the echo of the community's rights, and a direct avenue for contact between the people of the community.—Albion, Indiana, Democrat.

Fawn Is Saved. A fawn found by Arthur Jones, superintendent of logging operations for J. H. Chambers & Son, has responded to a milk diet, has recovered from exposure and likes its home with the Jones family. It is believed that the mother of the fawn has been killed. Mr. Jones found the fawn while tramping through the woods. It was almost dead and offered no objection to being carried to the Jones home. Mr. Jones has obtained a permit from the game department to keep the animal.

A. & M. Make Improvements. A corrugated iron roof has been placed over the engine room of the Anderson & Middleton mill at Latham and a new conveyor has been installed from the head rig to the boiler room and storage bin. The iron roof was placed in order to secure a reduction in insurance rates. The company has made no announcement as to resumption of operations.

Domestic Logic. It is nothing at which to wonder. The little Portland boy is quite young and has not yet fallen a victim to the charm of exaggeration. Furthermore, he has a grandmother, a nice lady, but nervous. When he was asked if he could tell the number of feet in a rod he shook his head, but declared a belief that a rod was about as long as a short stove poker or a long lead pencil.

It appears he had heard his grandmother say that she jumped a rod every time the doorbell rang and had drawn his own conclusions, as a bright child would. Grandmother, I think, considerable of a jumper at that.—D. H. Talmadge in Portland Oregonian.

Left Immortal Work. Peter Mark Roget, who compiled the thesaurus which bears his name, was an English physician and scholar, born in London, 1779, died in 1859. He studied medicine at the University of Edinburgh and removed to Manchester where he became physician to the lunatic asylum, the fever hospital and the infirmary. He settled in London in 1808, and was long secretary of the Royal Society. Among his works are "Animal and Vegetable Physiology" (1834) and "A Thesaurus of English Words and Phrases" (1852), which passed through 28 editions in the author's lifetime, was edited by his son in 1879 and became a standard work of reference.

Mystery of Brain. An "Institute of brains" has been opened in Moscow for special research into the mysteries of the human nervous system and the brain, says Popular Mechanics Magazine. One of the aids in use there is a remarkable instrument that divides the brain into five equal sections, and makes a wax impression of it at the same time. After this, the organ is cut into 25,000 to 30,000 thin slices for study under the microscope. The brain of Lenin, the late Russian leader, has been studied in this way and directors of the institute propose to examine the brains of other great persons in Russia after their death.
