

LIONS CLUB COMMITTEES ARE NAMED BY LOMBARD

The following standing committees for the year were named at the Lions club meeting last Thursday by President Herbert Lombard: Membership, Dr. Harold Askey, Victor Chambers and William Morlock; ways and means, George O. Knowles, Ray Short and C. A. Bartlett; finance, R. L. Stewart, Joe Smith and A. W. Helliwell; civic welfare, L. W. Colner, Worth Harvey and W. E. Lebow; entertainment, K. K. Mills, N. J. Nelson and J. S. Stewart; major activities, Earl Hill, Denny Abel and Victor Chambers; attendance, William Thum, W. A. Woodard and W. J. Woods; industrial, S. L. Macklin, W. A. Garoute and D. S. Harwood.

The club voted to support the public playground, will assist in fixing it up and will purchase additional equipment.

The hardest part of a vacation is getting rested up afterward while trying to catch up with the work neglected during your absence.

Eyes Are Injured.

John Dugan, sawyer at the W. A. Woodard mill, has been off the job a week as the result of being struck in one eye by a particle that flew from a log that was being sawed. The injury was serious and there was a severe hemorrhage of the eye ball, but Mr. Dugan will be able to return to work within a few days.

Jim Huff of this city lost the sight of his right eye a few days ago while working in the woods out from Crosswell. He fell onto the sharp point of an iron bar, which pierced the eye ball.

Water Right Notice Filed.
Lorane school district No. 36 has filed on the water of two springs, tributaries of the upper Siuslaw river, for drinking purposes, for shower baths and for watering the school lawn, according to notice filed in the office of County Clerk Dillard.

Woman Eats Only Baby Food 3 Years

"For 3 years I ate only baby food, everything else formed gas. Now, thanks to Adierika, I eat everything and enjoy life."—Mrs. M. Gunn.

Even the FIRST spoonful of Adierika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adierika will surprise you. Cottage Grove Pharmacy & Owl Drug store.

United States Lax in Dealing With Old Age

It is significant that the discriminations practiced against men and women past their prime are of an origin peculiarly American. Abroad, such practices are hardly known. In virtually every civilized nation the responsibility for the old age of workers has been removed from the individual concern and properly placed upon the entire industrial society, writes Abraham Epstein in the Forum.

Instead of depending upon such employer to provide against the handicaps of old age, comprehensive old age insurance or pension plans have been instituted which guarantee the aged worker at least some assistance in his declining years.

These social provisions permit employers to engage men and women at any age without hesitation as long as they are capable of performing a particular task. When they become incapacitated either the individual pension plan takes care of them. In none of the industrial countries is the attainment of the age of forty fraught with the dangers that confront our American wage earner whether manual or professional. May not the solution of our problem lie along the same path?

Bees Have Long Been Working for Mankind

The busy bee was probably the first created thing whose labors were exploited by mankind. In the Hittite code of laws, dated 1300 B. C., punishments for the theft of bees and hives were mentioned. About 4000 B. C. the bee was adopted as the symbol for the king of Lower Egypt. Hieroglyphic bees were found from the First dynasty down to Roman times, a period of 4,000 years.

Beekeeping was regularly practiced in Egypt in 2600 B. C.; reliefs showing the conformation of a hives—mud structures placed one over the other—and the men engaged in pouring out the honey and sealing it in jars. But thousands of years before this the wild honey was extracted from rocks and trees. It was only in comparatively recent times some six or seven thousand years ago, that it occurred to man to reduce the bee to slavery.

An Obvious Need

Israel Zangwill used to be fond of telling a tale about his little son Oliver—now grown up—to illustrate the debt he owed to his wife for taking such good care of him. Seeing a snail in the middle of the road, near Far End (their home at East Preston, Sussex), Mr. Zangwill removed it humanely to the hedge.

"What's that for?" asked Oliver, then a mere baby. His father explained that if the foolish snail continued to wander about the middle of the road it would certainly be run over.

"Then why doesn't he get a wife to look after him?" asked the little boy, drawing upon his daily experience of woman's sphere in married life.—Exchange.

Improved Miner's Pan

To take the place of the familiar pan in separating gold from sand and gravel, a whirling bowl devised by a Nebraska man is operated on the same principle as a cement mixer or cream separator, says Popular Mechanics Magazine. A revolving screen removes the coarse gravel before the material is run into the bowl itself. This is fitted with grooves that retain the heavy gold particles as the container turns. The outfit is operated by a small engine and there is a pump to furnish water. A small unit will handle from twenty to thirty tons of material a day.

Microscopic Writing

Ages ago in the ancient world the blind of Homer was said to have been written by a hermit in such tiny letters that the complete work could be preserved in a walnut shell.

This story was doubted for many years until a learned Frenchman proved that by writing with a fine quill pen on a piece of vellum eight inches by ten, he could write thirty verses in each line and could get 250 lines on each side of the sheet. Thus the vellum would hold 7,500 verses on each side, making the total of the 15,000 verses of the Iliad.

Simple Happiness Rule

A famous singer recently told how four other great singers who were to sing together at a gala occasion, quarreled over the question as to who should go first on the stage. All four were rich and famous, yet they made themselves miserable about such a little thing. The girl who is wretched if she sees another honored before her, will sooner or later ruin what might be a happy life. "In honor preferring one another" may not be an easy rule to follow, but it will surely bring peace to the mind and heart.—Exchange.

Good Bargain

"Isn't that a new coat, Mandy?" asked the clerk in a small town store of a seemingly happy customer, a large, good-natured colored woman who recently had been married for the third time.

"Yes, sir, this is a new coat. This is a present to me from my new man," admitted Mandy.

"And what did you give him?" asked the curious one.

"Me? What did I give him? I give him nothing 'cept just me. I just give him me."

Petroleum Used by Builders Long Ago

Petroleum products were well known to the ancients, according to the youngest son of L. L. Lemphill, a Scottish laird. Speaking before the Royal Aeronautical society in London, Lemphill said, "We read in the Bible the account of the building of the Tower of Babel and learn that 'Sulphur had they for mortar.' The slime was bitumen."

He further mentioned that Pliny and other ancient writers have referred to the use of "Scllar oil" for illuminating purposes. The Dead sea, originally named the Lacus Asphalticus, provided bitumen, which was sold to the Egyptians for embalming purposes. In the East the petroleum industry was a growing concern before the Christian era. Egyptian than this the Chinese and Japanese had sunk oil wells and ventilated the shafts by means of bellows. In Japanese history it is related that "burning water" was found in the reign of Tenji, or about 1,200 years ago.

About the year 1690 a Japanese named Magara found oil which he subsequently distilled. The product was sold as an illuminant. It is thought this was the first instance of an attempt to split up the crude oil into its component parts.—Kansas City Star.

Majority of Mankind Too Easily Excited

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is a don't-get-excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is, we get too excited over little things and not excited enough over the big ones.

Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs, more can be accomplished through peace and placidity than through effervescence and seismic phenomena.

If a don't-get-excited club could be so organized as to conserve all the human voltage that now goes to waste through needless excitement it would mean that mankind had reached the suburbs of a new era.—Harry Daniel in Thrift Magazine.

Plea for Tolerance

What is abhorrent to you may not only be justifiable conduct to another, but actually praiseworthy. That is where the spirits of tolerance and charity come in. We can't all think alike, any more than all trees can bear similar foliage and fruit. We are all inconsistent. Not one of us acts according to the standard his best self sets.

Besides, we are all more or less like the man in the fable, who carried two wallets over his shoulder, one in front and one behind. The one behind contained his own faults, the one in front his neighbor's. Can it be wondered that he was always conscious of his neighbor's faults and forgetful of his own?—London Tit-Bits.

Elephants Were Lightest

The true dance brings the lightest possible bodily perfection. Through it one can attain perfect poise. It is not a question of weight. A few years ago, in the Hippodrome, I saw a troupe of dancers. They were little girls, none over seven. Yet their little bodies were tense and rigid, and they came down bump! Then came some performing elephants. The beasts weighed thousands of pounds, yet as they danced from side to side, no one could hear the sound of their feet. The animals had poise . . . they were at ease, and they had natural understanding of the laws of balance and movement.—Edwin Strawbridge in the Dance Magazine.

Canvas Modern Buckskin

The modern hunter uses canvas where Daniel Boone and the old-timers would have used the skin of some animal, according to a writer in Field and Stream. "Canvas is in reality a substitute for skins," he writes. "Its principal uses are for clothing, shelter and equipment. The pioneer wore trousers, moccasins, and a shirt or a jacket made of buckskin. The modern hunter carries forth clad in a canvas cap or hat, canvas gloves, canvas hunting coat, canvas trousers, canvas leggings, and sometimes canvas-topped shoes."

Abuse Doesn't Prevent Use

The abuse of anything does not invalidate its genuinely ethical use. As long as we are what we are, that is, as long as we have veriform appendages in our bodies and evil in our souls, some of us will abuse anything. That inevitable abuse will never be an ethically valid reason for denying, much less for attempting to prohibit, the ethical use of that same thing. Whether that thing be alcohol or sex or money.—Plain Talk Magazine.

Earliest Newspapers

It is hard to say just when newspapers began, for the first papers, or pamphlets, publishing news did not appear with any regularity. They appeared when there was something important to tell. For instance, there was a French pamphlet published in 1492 telling of the surrender of Granada by the Moors to Ferdinand and Isabella. Possibly there was another edition when Columbus discovered America, but no record has been found of that.

Heavy Toad Migration Due to Wet Weather

An unusual number of migrating toads is attributed by biologists of the United States Department of Agriculture to an extraordinarily wet season. There is on record a migration of thousands of these little amphibians along seven or eight miles of the Dalles-California highway on the east shore of Upper Klamath lake, Oregon. The toads were all moving in one direction across the road and automobiles were killing them by the hundreds. The live ones were hopping over the dead ones and continuing their journey. The dead toads probably furnished food for crows and magpies, as there was scarcely a toad carcass to be seen when the same region was visited a day later.

These toads, upon emergence from their winter hibernation retreats, proceed to the shallow edges of some lake, or stream, and the female begins laying from 4,000 to 5,000 eggs. The hatching period depends upon the temperature, usually requiring from three to twelve days. The transformation of a tadpole to a young toad takes place some time between fifty and sixty-five days after hatching and under abnormal conditions has required two hundred days. The newly transformed toad leaves the water and many of them perish before they find some sheltered retreat. Under certain conditions literally thousands of these young toads emerge from the water at the same time.

Dainty Feeding Not Possible With Gull

Gutteny a vice? Not so to the river gull of black-tipped wings. In the Northwest it swoops down and snatches fish from the very hands of anglers and fighting off thousands of its fellows, proves that gutteny is a virtue enabling the one that can most speedily swallow to survive. Whole flocks of these l-jd and ruthless birds hover around the salmon fishers and watch their twitching lines sunk deep in the Columbia, says a writer in the Portland Oregonian, and 20 will sometimes strike for the flopping prize. The victor must swallow quickly as he darts upward beating off the buffettings of his greedy rivals. Sometimes he must swallow a fish so large that in its new position it destroys his aerial balance and down he goes to the waves. The Indians of the Northwest have a legend that a giant once became so annoyed with the winged robbers that he caught a whole flock of them into his campfire. Hence they say, the black-tipped wings.

Silly, Don't You Know!

The employer was very annoyed at an accident that had damaged one of his moving vans.

"Look here, Leary," he said, "just tell me what happened." "Well," replied the driver, "I was driving my van up the street when a car shot out of a side turning. I pulled up dead, and a chap in a big car ran into the back of my van."

The employer nodded briefly. "He jumped out," continued the other, "and shouted: 'Why didn't you put your hand out?'" "Put out my hand," I says. "If you couldn't see the van, how could you see my hand?"—Cleveland News.

Running Water

"One's desires and affinities go out toward the full streams. How many a parched place they reach and lap in one's memory! How many a vision of naked pebbles and sun-baked banks they cover and blot out! They give eyes to the fields; they give dimples and laughter; they give light and motion. Running water! What a delightful suggestion the words always convey! One's thoughts and sympathies are set flowing by them; they unlock a fountain of pleasant fancies and associations in one's memory; the imagination is touched and refreshed."—John Burroughs.

Dahlia Mexican Flower

The dahlia was first discovered in Mexico in 1615, where it was growing in the wilderness of the Sierrita in myriads of colors. The Spanish botanists, Cervantes and Cavanilles, were the first to appreciate the greatness of this flower. Seeds of the dahlia were received at the royal gardens at Madrid in 1789 by Abbe Cavanilles. The first of these seeds flowered in 1790, producing semi-double flowers which were named after Dr. Andrew Dahl, a Swedish botanist.

The Robbery

"What happened when the robbers broke into the Right Place stores?" asked an acquaintance.

"When they heered me jump out o' bed wot getting the alarm," replied Constable Blackpuiter, the faithful guardian of the peace and dignity of Petunia. "They tumbled through the door and fled like the wind, as the feller said. Went so fast, I gorry, that none of the clegs they dropped have struck the ground till plumb yet."—Kansas City Star.

His Reason

"What on earth made you get such an enormous kennel for that tiny dog of yours?" asked the clean-shaven man.

The other turned about and inspected his dog's kennel. Then he swung round and faced his questioner, an awful smile hovering round his mouth.

"Well, between you and me and the gatepost," he began. "It's because I sometimes come home late and my wife locks the door!"

Saxophone's History

The saxophone was introduced in 1846 by Adolph Sax, to whom are ascribed numerous other instruments. Four years later it was found in the French army bands and was afterward adopted in England at the royal military school of music at Kneller hall.

NOTICE TO CREDITORS.

Notice is hereby given that the undersigned has been appointed by the county court of the State of Oregon for Lane county, executor of the estate of Benjamin F. Riddle, deceased. All persons having claims against said estate are hereby required to present the same, properly verified and with vouchers therefor, to the undersigned at the office of Gordon S. Wells, court house, Eugene, Oregon, within six months from the date of the first publication hereof.

Date of first publication hereof is July 5, 1928.

RODNEY ROACH, Executor of the Estate of Benjamin F. Riddle, deceased.

By 5-ag2c Riddle, deceased.

NOTICE OF FINAL SETTLEMENT.
