Wild Animal Circus Here Tonight. C. H. Alton's wild animal circus will give one performance here tonight. Twenty big circus acts, a ten-piece military band, a big troupe of clowns, a large menagerie and performing bands of all kinds are included in the entertainment. Lions, tigers, leopards, jaguars, cheetahs and panthers are among some of the animals in the menagerie. While these animals draw much of the public's interest, Mr. Alton said, the monkey cage is the most popular, especially at the present time, for a monkey was born three weeks ago and the antics of it and its mother draw the crowds. ENDURING AS MULTNOMAH FALLS

Eliminate valve-grinding with this oil of "endurance beyond belief." Stops carbon trouble, too

Stability The new Cycol will stand the hardest kind of usage. It is refined to meet the severer conditions of heat and pressure developed by the modern high compression engines, assuring you an unbroken oil film where heat, pressure and friction are greatest.

No Acids The new Cycol refining process eliminates the use of acids, though most refiners use them. While acids clear the "crude oil" they chemically change its structure and composition, thus seriously cutting its lubricating value.

Such oils break down under engine temperatures. They distill off and escape as vapor through the breather-exhaust.

The new refining process of Cycol selects from the "crude" those elements of greatest lubricating value and stability in performance, rejecting those elements which readily break down under engine heat and cause excessive carbon deposits.

So Cycol gives a protective oil film on cylinder walls and moving parts, not vapor at the breather pipe.

Less Carbon As to carbon, Cycol like all oils deposits some carbon. But it deposits less carbon than any other oil. The most exhaustive tests have proven that statement.

Even more important, the carbon that is deposited by Cycol is soft and easily removable. It is not hard or sticky and cannot scratch a cylinder.

Prove it yourself Cycol gives you the finest results you have ever known—more perfect lubrication, "endurance beyond belief" and the elimination of carbon troubles.
