Suddenly, out of a spring sky...

ALL was well on the telephone front on April 27, 1928. Suddenly, out of a spring sky, rain began to fall, and as night came on this turned into a furious storm of sleet, snow and wind. In 48 hours, 3700 telephone poles and 7000 miles of wire were down; 39 exchanges were isolated; 11,000 telephones were silent.

Repair crews were instantly sent to the scene. In record time 1000 men from five states were on the job. Within 72 hours the isolated exchanges and telephones were back in service.

In any crisis there are no state lines in the Bell System. In all emergencies of flood or storm, as well as in the daily tasks of extending and maintaining the nation-wide network, is seen the wisdom of One Policy, One System, Universal Service.

High School Notes

OPEN HOUSE.

Just what does our high school accomplish? And how does it appear to the public? The purpose of our open house, which will be held in the high school April 23 under the management of the sophomore class, is to show the people what our high school really does. The community has seen our football games, operettas and plays but we want to show the public that we have more to show for our efforts than just plays and athletics. We want to prove that we really do accomplish something along the line of academic work and do study and learn for all our good times and fun. And we can do this only by cooperating with each other and with the sophomores, who have charge, and in every way striving to make our open house a success. We can make this a success only by the efforts of every student in the school. The teachers cannot do it all and, after all, it is our work we want to show! So let's cooperate with teachers and fellow students and give the idea of an open house to the public that we do have something to show for the time and money they spend on our behalf and with your help, students, this open house is bound to be a success.

An assembly was held Thursday morning during which Evelyn Shand and Gladys Vearous were awarded certificates of efficiency from the local Typewriter company. Helen Olson was presented a silver pin from the Underwood company and Kenneth Goff, Connie Hutchinson and Fred Wanker received bronze pins from the International Typewriter company. The students then went to the gymnasium, where two numbers by the operetta cast were presented to advertise the operetta "Pickles," which was presented at the Arcade theater Friday night.

The seniors, who managed the operetta, directed a poster contest, won by Genevieve Meranda, and a ticket-selling contest between the classes, won by the seniors. The amounts turned in for tickets were: Seniors, \$3.45; freshmen, \$25.55; juniors, \$18.40; sophomores, \$16.95. The two individual students who sold the most tickets were John King, senior, \$2.15, and Arthur Olson, freshman, \$2.00.

The following books have been added to the school library: The American encyclopedia in 30 volumes; "The Glorious Adventure," Halliburton; "Harmer John," Walpole; "Warren the Arch," Wiley; "The Three Kings," Hays; "The Road to the Middle Ages," Hardy; "Last of the Barons," Lytton. These books were purchased with fines from overdue books.

The faculty met Monday afternoon to discuss plans for the open house to be held in the high school building April 23. Exhibits will be placed in the following rooms: English work, 12; history, 13; mathematics, 6; public speaking, 7; civics and U. S. history, 11; typing, 10; penmanship and bookkeeping, 8; domestic art, 9; domestic science, gymnasium; agriculture, gymnasium; science, 14. A physical education demonstration and a program will be presented in the auditorium. Light refreshments will be served by the domestic science girls in the gymnasium. All friends and patrons of the school are invited to attend this open house.

S. O. S.

The telephone rang wildly! S. O. S. S. O. S. Mr. Averill! S. O. S. Mr. Averill was summoned. "Please sir, could you tell us what to do for a sick horse? We don't know what's the matter—she's just sick." So Mr. Averill rushes to his shelf of books. He snatches book after book and maddily, feverishly turns the pages. Ah! At last! Rushing back to the telephone he prescribes everything from turpentine to linseed oil. Not satisfied with that he hurries back to his classroom, gives brief instructions to several of his students and sends them to carry out his prescriptions.

"Hm! A horse doctor in our midst!" THE OFFICE CAT.

The sophomore class, under the direction of Mr. Averill, their advisor, are taking the most efficient of the high school lawn. They intend to reseed it when it is sufficiently cleaned out.

The agriculture department is now cooperating in conducting a demonstration on the T. W. U. route farm to determine the usefulness of Chilean nitrate super phosphate and sulphate of potash.

Merina Wehrum, a former student, visited school Monday. She is now living in Vancouver.

Velma Ewing Hansen entered school as a senior Monday morning. She left school to be married last semester. She has returned from California and entered school again so she can graduate with her class.

Leo Rodgers, a graduate of '28, visited school Thursday afternoon. Paul Gordon, a graduate of '27, has left O. A. C. for the spring term. He will enter college again next year.

Elzie Sears has been absent from school several days. Geneva Shattuck, a senior who was injured a month ago in an accident while returning from Bundon, is now able to sit up and has walked a little. She hopes to be back in school in another week.

Lone Wicks has been absent from school for more than a week because of illness. Lloyd Pleasard returned to school Tuesday morning, after being absent two days.

The freshmen first defeated the junior first 27-17 in baseball Tuesday. The senior girls' first team defeated the sophomore first 34-17 in basketball Thursday. This game gave the seniors the championship in basketball.

Machine bookkeeping equipment and supplies. The Sentinel.

NOTICE FOR PUBLICATION.

Department of the Interior, U. S. Land Office at Roseburg, Ore., March 23, 1929. Notice is hereby given that Carl Small, of P. O. route, Cottage Grove, Ore., who on February 23, 1926, made Homestead Entry No. 014603, for 8 1/4, 8 1/4 and 8 1/4 sections 29, township 22 N., range 3 West, Willamette meridian, has filed notice of intention to make three year proof, to establish claim to the land above described, before the U. S. Land Office at Roseburg, Ore., on the 7th day of May, 1929.

Claimant names as witnesses: J. W. Mauser, W. T. Jones, Edward N. Brasher and Robert Phillips, all of Cottage Grove, Ore. HAMILL A. CANADAY, non-coal m28-243.

Faith to Her "Folks"

Old "Mammy's" Passion

Unswerving faith to her "white folks" was an outstanding characteristic of the oldtime "mammy." The instances are many where even after her emancipation she remained with the family to which she had belonged to succeeding generations. She not only waited on "old Miss" during life and closed her eyes when she fell asleep in death, but she was present at the birth of all the children and helped to rear them, and mayhap to perform the same office for the grand children, and great-grandchildren. When "Young Miss" was married "mammy" usually exercised her prerogative of being the first to kiss the bride, and "mammy's" osculatory assistance not only was sincere and genuine, but it was regarded as good luck.

Often "mammy's" own "white folks" became financially embarrassed and lost everything, but "mammy" did not desert them. On the other hand, she invariably stuck to them through thick and thin and was willing to share any reverses to which they might be subjected. Here was a devotion that was strong and lasting.

Her "white folks" might forgive an enemy, but "mammy" never forgot or forgave one who wronged any of her people. Often she took the family name with which she was so long identified and in death many of the oldtime "black mammys" sleep in the family burial plot in a grave reserved for them. In many graveyards the epitaph on her tombstone bears witness to the fidelity of some negro "mammy."—Louisville Courier-Journal.

Differ Over Beginning of First Civilization

There are two independent theories as to the origin of civilization. The older theory is that the human mind is such that, given an opportunity, it will produce a civilization. But this does not account for the similarity of customs found in all civilizations, and so there exists the alternate theory that civilization started from a definite center, from which it spread.

"In his book, 'In the Beginning: The Origin of Civilization,' Elliot Smith, the chief exponent of the latter theory, sets this center in upper Egypt, on the banks of the Nile, and the time about 4000 B. C. The determining cause he believes to have been an abundant crop of wild barley, which caused man to give up his roaming life for a favorite climate and an assured food supply. Lean periods led to the invention of methods of storage, and this taught the greatest thing ever discovered by man—the function of the seed in plant growth. Having reached this stage, the further growth of civilization is not difficult to visualize.

No Perpetual Motion

Perpetual motion has never been successfully demonstrated. The views of the patent office are in accord with those of the scientists who have investigated the subject, and are to the effect that mechanical perpetual motion is a physical impossibility. These views can be rebutted only by the exhibition of a working model. Many persons have filed applications for patents on perpetual motion, but such applications have been rejected as inoperative and opposed to well-known physical laws, and in no instance has the requirement of the patent office for a working model ever been complied with.

Shaking Dice

It's rather discouraging that so many bad habits should be so old. One would think we would have outgrown many things that are almost as old as history and which we show no sign of outgrowing. It is said that dice throwing was so popular in India centuries ago that two kings, who had unpronounceable names, staked and lost their kingdoms on the spotted cubes. As far back as history goes there has been too much something or other of which there is still too much.

All of which calls for a sense of humor and much patience.—Grove Patterson, in the Mobile Register.

Farther Still

An Irishman and a Scot found themselves seated side by side at a certain Christmas club dinner and each tried to impress the other with the distance he had traveled. The Irishman admitted that he had sailed the Seven seas amongst other trifles and that he had been to the end of the world.

"And what did ye see there?" asked the Scot. "Sure, and there was a great big wall reaching to the sky, me boy, replied the other. "Ah, well," said the Scot, "it's a peety ye didna look over yon wall for I was behind it fishin' ye ken."

Skyscrapers' Value

The Greeks probably were the first to build the structures of extensive area, for they were credited with the first use of wooden beams. The Romans made the erection of buildings with even greater area possible by use of the arch and concrete. The development of the steel I-beam made really high buildings possible. Our present-day builders have developed skyscraper construction to a degree where valuable ground space can be completely utilized by the erection of a tall building of extensive floor space.

Relics of Great Empire

A tiny island, 93 square miles in area, represents all that France has left of her once great North American possessions. It is St. Pierre of Newfoundland.

Calculated Frenzy?

A new way of avoiding paying for one's dinner was practiced in Paris recently, according to the London Morning Post. When the customer's bill was presented to him he went off his head and had to be removed to the nearest hospital under control. It is a matter of speculation whether the composition of the menu or of the bill was the cause of the diner's attack of frenzy.

Famous Indian Pass

The Khyber pass, the most important of the passes which lead into India from Afghanistan, is a narrow defile winding between cliffs 600 to 1,000 feet high. At the narrowest part of the pass it is about 15 feet wide.

Government Urged to Go Into General Business

Newspaper Suggests Selling of Groceries on Same Basis as Envelopes.

(Newberg Graphic.)

The newspapers all over the country have been raising a tremendous cry because of the fact that the United States government furnishes printed envelopes to its customers at less than cost and because the printers over the country cannot compete with them. The papers have been maintaining that the government has no right to enter into competition with them.

Of course the newspapers are wrong in this contention. The government is acting in the interests of the public in reducing the cost of living for everyone, is it not? By furnishing stamped envelopes with printed return card for the power companies, public utilities of all kinds, banks, business houses, etc., the government is saving money for these great institutions and in turn you, dear reader, have noticed no doubt tremendous reductions in your light bills, telephone bills, grocery bills, etc. Have you not?

But let us try the case a little further. Admitting the right of the government to sell printed envelopes return cards in competition with private printers, shall we take the next step with you who are buying your government printed envelopes? Why not have the gov-

ernment furnish the electricity at less than cost? Why not have the government operate the telephone system at less than cost? Why not have the government act as food and clothing distributors at less than cost?

Ab, but you any someone would have to pay for it all. True, brother, true! But how about those government printed envelopes which you are using to send out your monthly bills to the printers for electricity, telephone tolls, groceries, etc.?

Doesn't someone pay for the loss there? We wonder why it is that the same sort of shoe cannot be made to fit other concerns as well as the printing industry. We have not heard of very many millions being made by printers, but we do seem to recall fortunes made in the power business; the telephone business; the mercantile business, etc.

Why not be fair about this envelope business? Do you who buy government printed envelopes real-

Since January first, over 300,000 people have chosen the Chevrolet Six. And every day sees an increase in this tremendous public acceptance—

—for the new Chevrolet not only brings the enjoyment of six-cylinder performance within the reach of everybody everywhere, but gives the Chevrolet buyer a greater dollar value than any other low-priced car.

Just consider what you get in the Chevrolet Six! The smoothness, flexibility and power of a six-cylinder engine which delivers better than twenty miles to the gallon. The beauty and luxury of bodies by Fisher with adjustable driver's seat. The effortless control of big, quiet, non-locking 4-wheel brakes and ball bearing steering. Then consider Chevrolet prices! And you will discover that this fine quality Six can actually be bought in the price range of the four! (Come in. Let us prove that anyone who can afford any car can afford a Chevrolet Six!)
