THE FINANCIAL TRIANGLE

The financial triangle we have in mind is not the one that may be thought of by those who believe it to be the problem of adding and subtracting a person's income to make it meet multiplying expenses. The triangle we are thinking of is federal inspection, the federal reserve system and the known reliability of its directors which make this bank the outstanding financial institution of the country it serves.

2 OUTSTANDING ADVANTAGES ALL THE MECHANISM IS ON TOP THE CABINET IS ALL-STEEL OF the many advantages of General Electric Refrigerators, two are especially vital—the hermetically sealed, on-top mechanism and the all-steel warp-proof cabinet. The mechanism in any electric refrigerator has but one purpose—to absorb heat from the food. It must be permitted to radiate that heat rapidly just as heat is conducted away from the engine of your car. As heat naturally rises, it can be radiated from the top of the refrigerator. To place the radiating coils anywhere else cuts down their efficiency and increases the cost of operation. And now has been added the new all-steel cabinet. Built like a safe, it can't warp—it operates on the least amount of current—its doors always retain their perfect fit which shuts out heat. Available in six sizes at prices surprisingly low. The small family size is but \$215, at the factory. Sold on convenient time payments.
